

Used QAC Messages

This table lists all QAC messages incorporated in the M2CM-3.2-QAC-8.1.2 compliance module.

Msg No	Message	Rule
160	[U] Using unsupported conversion specifier number %s.	1.2
161	[U] Unknown length modifier used with 'i' or 'd' conversion specifier, number %s.	1.2
162	[U] Unknown length modifier used with 'o' conversion specifier, number %s.	1.2
163	[U] Unknown length modifier used with 'u' conversion specifier, number %s.	1.2
164	[U] Unknown length modifier used with 'x' conversion specifier, number %s.	1.2
165	[U] Unknown length modifier used with 'X' conversion specifier, number %s.	1.2
166	[U] Unknown length modifier used with 'f' conversion specifier, number %s.	1.2
167	[U] Unknown length modifier used with 'e' conversion specifier, number %s.	1.2
168	[U] Unknown length modifier used with 'E' conversion specifier, number %s.	1.2
169	[U] Unknown length modifier used with 'g' conversion specifier, number %s.	1.2
170	[U] Unknown length modifier used with 'G' conversion specifier, number %s.	1.2
171	[U] Unknown length modifier used with 'c' conversion specifier, number %s.	1.2
172	[U] Unknown length modifier used with '%%' conversion specifier, number %s.	1.2
173	[U] Unknown length modifier used with 's' conversion specifier, number %s.	1.2
174	[U] Unknown length modifier used with 'n' conversion specifier, number %s.	1.2
175	[U] Unknown length modifier used with 'p' conversion specifier, number %s.	1.2
176	[U] Incomplete conversion specifier, number %s.	1.2
177	[U] Field width of format conversion specifier exceeds 509 characters.	1.2
178	[U] Precision of format conversion specifier exceeds 509 characters.	1.2
179	[U] Argument type does not match conversion specifier number %s.	1.2
180	[C99] Use of ll for conversion specifier.	1.1
184	[U] Insufficient arguments to satisfy conversion specifier, number %s.	1.2
185	[U] Call contains more arguments than conversion specifiers.	1.2
186	[U] A call to this function must include at least one argument.	1.2
190	[U] Using unsupported conversion specifier number %s.	1.2
191	[U] Unknown length modifier used with 'd/i/n' conversion specifier, number %s.	1.2
192	[U] Unknown length modifier used with 'o' conversion specifier, number %s.	1.2
193	[U] Unknown length modifier used with 'u' conversion specifier, number %s.	1.2
194	[U] Unknown length modifier used with 'x/X' conversion specifier, number %s.	1.2
195	[U] Unknown length modifier used with 'e/E/f/F/g/G' conversion specifier, number %s.	1.2
196	[U] Unknown length modifier used with 's' conversion specifier, number %s.	1.2
197	[U] Unknown length modifier used with 'p' conversion specifier, number %s.	1.2
198	[U] Unknown length modifier used with '%%' conversion specifier, number %s.	1.2
199	[U] Unknown length modifier used with 'l' conversion specifier, number %s.	1.2
200	[U] Unknown length modifier used with 'c' conversion specifier, number %s.	1.2
201	[U] Incomplete conversion specifier, number %s.	1.2
202	[l] '-' character in 'l' conversion specification is implementation defined.	3.1
203	[U] Value of character prior to '-' in 'l' is greater than following character.	1.2
204	[U] Field width of format conversion specifier exceeds 509 characters.	1.2
206	[U] Argument type does not match conversion specifier number %s.	1.2
207	[U] 'scanf' expects address of objects being stored into.	1.2
208	[U] Same character occurs in scanset more than once.	1.2
232	[C] Value of hex escape sequence is not representable in type 'unsigned char'.	1.1
233	[C] Value of octal escape sequence is not representable in type 'unsigned char'.	1.1
235	[U] Unknown escape sequence.	4.1
235	[U] Unknown escape sequence.	1.2
240	[E] This file contains the control-M character at the end of a line.	1.1
241	[E] This file contains the control-Z character - was this transferred from a PC?	1.1
244	[C] Value of character constant is not representable in type 'int'.	1.1
246	[E] Binary integer constants are a language extension.	1.1
261	[C] Comment still open at end of included file.	1.1
275	[U] Floating value is out of range for conversion to destination type.	1.2

284	[I] Multiple character constants have implementation defined values.	3.1
285	[I] Character constant contains character which is not a member of the basic source character set.	3.1
286	[I] String literal contains character which is not a member of the basic source character set.	3.1
287	[I] Header name contains character which is not a member of the basic source character set.	3.1
288	[I] Source file '%s' has comments containing characters which are not members of the basic source character set.	3.1
289	[I] Source file '%s' has preprocessing tokens containing characters which are not members of the basic source character set.	3.1
292	[I] Source file '%s' has comments containing one of the characters '\$', '@' or ''.	3.1
299	[I] Source file '%s' includes #pragma directives containing characters which are not members of the basic source character set.	3.1
301	[u] Cast between a pointer to object and a floating type.	1.2
301	[u] Cast between a pointer to object and a floating type.	11.2
302	[u] Cast between a pointer to function and a floating type.	11.1
302	[u] Cast between a pointer to function and a floating type.	1.2
303	[I] Cast between a pointer to volatile object and an integral type.	11.3
303	[I] Cast between a pointer to volatile object and an integral type.	3.1
304	[U] The address of an array declared 'register' may not be computed.	1.2
305	[I] Cast between a pointer to function and an integral type.	11.3
305	[I] Cast between a pointer to function and an integral type.	3.1
306	[I] Cast between a pointer to object and an integral type.	3.1
306	[I] Cast between a pointer to object and an integral type.	11.3
307	[u] Cast between a pointer to object and a pointer to function.	11.1
307	[u] Cast between a pointer to object and a pointer to function.	1.2
308	Non-portable cast involving pointer to an incomplete type.	3.1
309	[U] Integral type is not large enough to hold a pointer value.	1.2
310	Casting to different object pointer type.	11.4
311	Dangerous pointer cast results in loss of const qualification.	11.5
312	Dangerous pointer cast results in loss of volatile qualification.	11.5
313	Casting to different function pointer type.	11.1
316	[I] Cast from a pointer to void to a pointer to object type.	11.4
317	[I] Implicit conversion from a pointer to void to a pointer to object type.	11.4
320	[C99] Declaration within 'for' statement.	1.1
321	[C] Declaration within 'for' statement defines an identifier '%s' which is not an object.	1.1
322	[C] Illegal storage class specifier used in 'for' statement declaration.	1.1
336	Macro defined as an octal constant.	7.1
337	[U] String literal has undefined value. This may be a result of using '#' on \.	1.2
338	[C] Octal or hex escape sequence value is too large for 'unsigned char' or 'wchar_t' type.	1.1
339	Octal constant used.	7.1
341	Using the stringify operator '#'.	19.13
342	Using the glue operator '##'.	19.13
360	An expression of pointer type is being converted to type _Bool on assignment.	11.3
361	An expression of pointer type is being cast to type _Bool.	11.3
362	An expression of essentially Boolean type is being cast to a pointer.	11.3
400	[U] '%s' is modified more than once between sequence points - evaluation order unspecified.	1.2
400	[U] '%s' is modified more than once between sequence points - evaluation order unspecified.	12.2
401	[U] '%s' may be modified more than once between sequence points - evaluation order unspecified.	12.2
401	[U] '%s' may be modified more than once between sequence points - evaluation order unspecified.	1.2
402	[U] '%s' is modified and accessed between sequence points - evaluation order unspecified.	12.2
402	[U] '%s' is modified and accessed between sequence points - evaluation order unspecified.	1.2
403	[U] '%s' may be modified and accessed between sequence points - evaluation order unspecified.	1.2
403	[U] '%s' may be modified and accessed between sequence points - evaluation order unspecified.	12.2
410	[L] Nesting of parentheses exceeds 32 - program does not conform strictly to ISO:C90.	1.1
422	[C] Function call contains fewer arguments than prototype specifies.	1.1
422	[C] Function call contains fewer arguments than prototype specifies.	16.6
423	[C] Function call contains more arguments than prototype specifies.	16.6
423	[C] Function call contains more arguments than prototype specifies.	1.1
426	[C] Called function has incomplete return type.	1.1
427	[C] Object identifier used as if it were a function or a function pointer identifier.	1.1

429	[C] Function argument is not of arithmetic type.	1.1
430	[C] Function argument is not of compatible 'struct'/union' type.	1.1
431	[C] Function argument points to a more heavily qualified type.	1.1
432	[C] Function argument is not of compatible pointer type.	1.1
435	[C] The 'struct'/union' member '%s' does not exist.	1.1
436	[C] Left operand of '.' must be a 'struct' or 'union' object.	1.1
437	[C] Left operand of '->' must be a pointer to a 'struct' or 'union' object.	1.1
446	[C] Operand of ++/-- must have scalar (arithmetic or pointer) type.	1.1
447	[C] Operand of ++/-- must be a modifiable object.	1.1
448	[C] Operand of ++/-- must not be a pointer to an object of unknown size.	1.1
449	[C] Operand of ++/-- must not be a pointer to a function.	1.1
450	[C] An expression of array type cannot be cast.	1.1
451	[C] Subscripting requires a pointer (or array lvalue).	1.1
452	[C] Cannot subscript a pointer to an object of unknown size.	1.1
453	[C] An array subscript must have integral type.	1.1
454	[C] The address-of operator '&' cannot be applied to an object declared with 'register'.	1.1
456	[C] This expression does not have an address - '&' may only be applied to an lvalue or a function designator.	1.1
457	[C] The address-of operator '&' cannot be applied to a bit-field.	1.1
458	[C] Indirection operator '**' requires operand of pointer type.	1.1
466	[C] Unary '+' requires arithmetic operand.	1.1
467	[C] Operand of '!' must have scalar (arithmetic or pointer) type.	1.1
468	[C] Unary '-' requires arithmetic operand.	1.1
469	[C] Bitwise not '~' requires integral operand.	1.1
475	[u] Operand of 'sizeof' is an expression designating a bit-field.	1.2
476	[C] 'sizeof' cannot be applied to a bit-field.	1.1
477	[C] 'sizeof' cannot be applied to a function.	1.1
478	[C] 'sizeof' cannot be applied to an object of unknown size.	1.1
481	[C] Only scalar expressions may be cast to other types.	1.1
482	[C] Expressions may only be cast to 'void' or scalar types.	1.1
483	[C] A pointer to an object of unknown size cannot be the operand of an addition operator.	1.1
484	[C] A pointer to an object of unknown size cannot be the operand of a subtraction operator.	1.1
485	[C] Only integral expressions may be added to pointers.	1.1
486	[C] Only integral expressions and compatible pointers may be subtracted from pointers.	1.1
487	[C] If two pointers are subtracted, they must be pointers that address compatible types.	1.1
488	Performing pointer arithmetic.	17.4
489	The integer value 1 is being added or subtracted from a pointer.	17.4
491	Array subscripting applied to an object of pointer type.	17.4
492	Array subscripting applied to a function parameter declared as a pointer.	17.4
493	[C] Type of left operand is not compatible with this operator.	1.1
494	[C] Type of right operand is not compatible with this operator.	1.1
495	[C] Left operand of '%', '<<', '>>', '&', '^' or ' ' must have integral type.	1.1
496	[C] Right operand of '%', '<<', '>>', '&', '^' or ' ' must have integral type.	1.1
499	Right operand of shift operator is greater than or equal to the width of the essential type of the left operand.	12.8
513	[C] Relational operator used to compare pointers to incompatible types.	1.1
514	[C] Relational operator used to compare a pointer with an incompatible operand.	1.1
515	[C] Equality operator used to compare a pointer with an incompatible operand.	1.1
536	[C] First operand of '&&', ' ' or '??' must have scalar (arithmetic or pointer) type.	1.1
537	[C] Second operand of '&&' or ' ' must have scalar (arithmetic or pointer) type.	1.1
540	[C] 2nd and 3rd operands of conditional operator '??' must have compatible types.	1.1
541	[C] Argument no. %s does not have object type.	1.1
542	[C] Controlling expression must have scalar (arithmetic or pointer) type.	1.1
543	[U] 'void' expressions have no value and may not be used in expressions.	1.2
544	[U] The value of an incomplete 'union' may not be used.	1.2
544	[U] The value of an incomplete 'union' may not be used.	18.1
545	[U] The value of an incomplete 'struct' may not be used.	1.2
545	[U] The value of an incomplete 'struct' may not be used.	18.1
546	[C] 'enum %s' has unknown content. Use of an enum tag with undefined content is not permitted.	1.1

547	[C] This declaration of tag '%s' conflicts with a previous declaration.	5.4
547	[C] This declaration of tag '%s' conflicts with a previous declaration.	1.1
550	[C] Left operand of '+=' or '-=' is a pointer to an object of unknown size.	1.1
551	[E] Cast may not operate on the left operand of the assignment operator.	1.1
554	[C] 'static %s()' has been declared and called but no definition has been given.	1.1
555	[C] Invalid assignment to object of void type or array type.	1.1
556	[C] Left operand of assignment must be a modifiable object.	1.1
557	[C] Right operand of assignment is not of arithmetic type.	1.1
558	[C] Right operand of '+=' or '-=' must have integral type when left operand is a pointer.	1.1
559	[C] Right operand of '<<=', '>>=', '&=', ' =', '^=' or '%=' must have integral type.	1.1
560	[C] Left operand of '<<=', '>>=', '&=', ' =', '^=' or '%=' must have integral type.	1.1
561	[C] Right operand of assignment is not of compatible 'struct'/union' type.	1.1
562	[C] Right operand of assignment points to a more heavily qualified type.	1.1
563	[C] Right operand of assignment is not of compatible pointer type.	1.1
564	[C] Left operand of assignment must be an lvalue (it must designate an object).	1.1
565	[C] Left operand of '+=' or '-=' must be of arithmetic or pointer to object type.	1.1
570	This switch case label of 'essential type' '%1s', is not consistent with a controlling expression of essential type '%2s'.	10.1
572	This switch case label of 'essential type' '%1s' is not consistent with a controlling expression which has an essential type of lower rank (%2s).	10.1
580	[C] Constant is too large to be representable.	1.1
581	[I] Floating-point constant may be too small to be representable.	3.1
588	[C] Width of bit-field must be an integral constant expression.	1.1
589	[C] Enumeration constant must be an integral constant expression.	1.1
590	[C] Array bound must be an integral constant expression.	1.1
591	[C] A 'case' label must be an integral constant expression.	1.1
594	Negative 'case' label expression is incompatible with unsigned controlling expression in 'switch' statement.	14.1
601	[E] Function 'main()' is not of type 'int (void)' or 'int (int, char *[])'.	1.1
602	[U] The identifier '%s' is reserved for use by the library.	20.2
602	[U] The identifier '%s' is reserved for use by the library.	1.2
604	[C99] Declaration appears after statements in a compound statement.	1.1
605	[C] A declaration must declare a tag or an identifier.	1.1
609	[L] More than 12 pointer, array or function declarators modifying a declaration - program does not conform strictly to ISO:C90.	1.1
611	[L] Nesting of 'struct' or 'union' types exceeds 15 - program does not conform strictly to ISO:C90.	1.1
612	[L] Size of object '%s' exceeds 32767 bytes - program does not conform strictly to ISO:C90.	1.1
614	[L] More than 127 block scope identifiers defined within a block - program does not conform strictly to ISO:C90.	1.1
616	[C] Illegal combination of type specifiers or storage class specifiers.	1.1
617	[C99] 'const' qualifier has been duplicated.	1.1
618	[C99] 'volatile' qualifier has been duplicated.	1.1
619	[C] The identifier '%s' has already been defined in the current scope within the ordinary identifier namespace.	1.1
620	[C] Cannot initialize '%s' because it has unknown size.	1.1
621	[C] The struct/union '%s' cannot be initialized because it has unknown size.	1.1
622	[C] The identifier '%s' has been declared both with and without linkage in the same scope.	1.1
623	[U] '%s' has incomplete type and no linkage - this is undefined.	18.1
623	[U] '%s' has incomplete type and no linkage - this is undefined.	1.2
624	Function '%s' is declared using typedefs which are different to those in a previous declaration.	8.3
625	[U] '%s' has been declared with both internal and external linkage - the behaviour is undefined.	1.2
626	[U] '%s' has different type to previous declaration (which is no longer in scope).	8.4
626	[U] '%s' has different type to previous declaration (which is no longer in scope).	1.2
627	[C] '%s' has different type to previous declaration in the same scope.	8.4
627	[C] '%s' has different type to previous declaration in the same scope.	1.1
628	[C] '%s' has different type to previous declaration at wider scope.	1.1
628	[C] '%s' has different type to previous declaration at wider scope.	8.4
629	[C] More than one definition of '%s' (with internal linkage).	1.1
630	[U] More than one definition of '%s' (with external linkage).	1.2
630	[U] More than one definition of '%s' (with external linkage).	8.9

631	[C] More than one declaration of '%s' (with no linkage).	1.1
632	[U] Tentative definition of '%s' with internal linkage cannot have unknown size.	1.2
633	[E] Empty structures and unions are a language extension.	1.1
634	[I] Bit-fields in this struct/union have not been declared explicitly as unsigned or signed.	6.4
634	[I] Bit-fields in this struct/union have not been declared explicitly as unsigned or signed.	3.1
635	[E] Bit-fields in this struct/union have been declared with types other than int, signed int or unsigned int.	6.4
635	[E] Bit-fields in this struct/union have been declared with types other than int, signed int or unsigned int.	1.1
636	[U] There are no named members in this 'struct' or 'union'.	18.1
636	[U] There are no named members in this 'struct' or 'union'.	1.2
638	[C] Duplicate member name '%s' in 'struct' or 'union'.	1.1
639	[L] Number of members in 'struct' or 'union' exceeds 127 - program does not conform strictly to ISO:C90.	1.1
640	[C] '%s' in 'struct' or 'union' type may not have 'void' type.	1.1
641	[C] '%s' in 'struct' or 'union' type may not have function type.	1.1
642	[C] '%s' in 'struct' or 'union' type may not be an array of unknown size.	1.1
643	[C] '%s' in 'struct' or 'union' type may not be a 'struct' or 'union' with unknown content.	1.1
644	[C] Width of bit-field must be no bigger than the width of an 'int'.	1.1
645	[C] A zero width bit-field cannot be given a name.	1.1
646	[C] Enumeration constants must have values representable as 'int's.	1.1
647	[L] Number of enumeration constants exceeds 127 - program does not conform strictly to ISO:C90.	1.1
649	[C] K&R style declaration of parameters is not legal after a function header that includes a parameter list.	1.1
650	[C] Illegal storage class specifier on named function parameter.	1.1
651	[C] Missing type specifiers in function declaration.	1.1
653	[C] Duplicate definition of 'struct', 'union' or 'enum' tag '%s'.	1.1
654	[U] Using 'const' or 'volatile' in a function return type is undefined.	1.2
655	[C] Illegal storage class specifier on unnamed function parameter.	1.1
656	[C] Function return type cannot be function or array type, or an incomplete struct/union (for function definition).	1.1
657	[C] Unnamed parameter specified in function definition.	1.1
658	[U] Parameter cannot have 'void' type.	1.2
659	[C] The identifier '%s' was not given in the parameter list.	1.1
660	[E] Defining an unnamed member in a struct or union. This is a language extension.	1.1
661	[U] '%s()' may not have a storage class specifier of 'static' when declared at block scope.	1.2
662	[E] Accessing a member of an unnamed struct or union member in this way is a language extension.	1.1
664	[C] Parameter specified with type 'void'.	1.1
665	[C] Two parameters have been declared with the same name '%s'.	1.1
667	[U] '%s' is declared as a typedef and may not be redeclared as an object at an inner scope without an explicit type specifier.	1.2
668	[U] '%s' is declared as a typedef and may not be redeclared as a member of a 'struct' or 'union' without an explicit type specifier.	1.2
671	[C] Initializer for object of arithmetic type is not of arithmetic type.	1.1
672	[U] The initializer for a 'struct', 'union' or array is not enclosed in braces.	1.2
673	[C] Initializer points to a more heavily qualified type.	1.1
674	[C] Initializer for pointer is of incompatible type.	1.1
675	[C] Initializer is not of compatible 'struct'/'union' type.	1.1
676	[u] Array element is of function type. Arrays cannot be constructed from function types.	1.2
677	[C] Array size is negative, or unrepresentable.	1.1
678	[u] Array element is array of unknown size. Arrays cannot be constructed from incomplete types.	1.2
680	[u] Array element is 'void' or an incomplete 'struct' or 'union'. Arrays cannot be constructed from incomplete types.	1.2
682	[C] Initializer for object of a character type is a string literal.	1.1
683	[C] Initializer for object of a character type is a wide string literal.	1.1
684	[C] Too many initializers.	1.1
685	[C] Initializer for any object with static storage duration must be a constant expression.	1.1
686	Array has fewer initializers than its declared size. Default initialization is applied to the remainder of the array elements.	9.2
690	[C] String literal contains too many characters to initialize object.	1.1

693	Struct initializer is missing the optional {.	9.2
694	Array initializer is missing the optional {.	9.2
698	[C] String literal used to initialize an object of incompatible type.	1.1
699	[C] String literal used to initialize a pointer of incompatible type.	1.1
706	[U] Label '%s' is not unique within this function.	1.2
708	[C] No definition found for the label '%s' in this function.	1.1
709	[C] Initialization of locally declared 'extern %s' is illegal.	1.1
715	[L] Nesting of control structures (statements) exceeds 15 - program does not conform strictly to ISO:C90.	1.1
723	Initialize none, first only, or all entries in this enumerator list.	9.3
735	Using relational or logical operators in a 'switch' expression is usually a programming error.	15.4
736	[C] 'case' label does not have unique value within this 'switch' statement.	1.1
737	[C] More than one 'default' label found in 'switch' statement.	1.1
738	[C] Controlling expression in a 'switch' statement must have integral type.	1.1
739	[L] Number of 'case' labels exceeds 257 - program does not conform strictly to ISO:C90.	1.1
745	[U] 'return;' found in '%s()', which has been defined with a non-'void' return type.	1.2
745	[U] 'return;' found in '%s()', which has been defined with a non-'void' return type.	16.8
746	[C] 'return exp;' found in '%s()' whose return type is 'void'.	1.1
747	[C] 'return exp;' found in '%s()' whose return type is qualified 'void'.	1.1
750	A union type specifier has been defined.	18.4
755	[C] 'return' expression is not of arithmetic type.	1.1
756	[C] 'return' expression is not of compatible 'struct'/'union' type.	1.1
757	[C] 'return' expression points to a more heavily qualified type.	1.1
758	[C] 'return' expression is not of compatible pointer type.	1.1
759	An object of union type has been defined.	18.4
766	[C] 'continue' statement found outside an iteration statement.	1.1
767	[C] 'break' statement found outside a 'switch' or iteration statement.	1.1
768	[C] 'case' or 'default' found outside a 'switch' statement.	1.1
770	A 'continue' statement has been used.	14.5
771	More than one 'break' statement has been used to terminate this iteration statement.	14.6
774	[C] 'auto' may not be specified on global declaration of '%s'.	1.1
775	[C] 'register' may not be specified on global declaration of '%s'.	1.1
777	[U] External identifier does not differ from other identifier(s) (e.g. '%s') within the specified number of significant characters.	5.1
777	[U] External identifier does not differ from other identifier(s) (e.g. '%s') within the specified number of significant characters.	1.2
779	[U] Identifier does not differ from other identifier(s) (e.g. '%s') within the specified number of significant characters.	5.1
779	[U] Identifier does not differ from other identifier(s) (e.g. '%s') within the specified number of significant characters.	1.2
780	Another identifier '%s' is already in scope in a different namespace.	5.6
781	'%s' is being used as a structure/union member as well as being a label, tag or ordinary identifier.	5.6
801	[C] The '##' operator may not be the first token in a macro replacement list.	1.1
802	[C] The '##' operator may not be the last token in a macro replacement list.	1.1
803	[C] The '#' operator may only appear before a macro parameter.	1.1
804	[C] Macro parameter '%s' is not unique.	1.1
809	[U] The '#include' preprocessing directive has not been followed by <h-char-sequence> or "s-char-sequence".	19.3
809	[U] The '#include' preprocessing directive has not been followed by <h-char-sequence> or "s-char-sequence".	1.2
810	[L] '#include "%s"' causes nesting to exceed 8 levels - program does not conform strictly to ISO:C90.	1.1
811	[C] The glue operator '##' may only appear in a '#define' preprocessing directive.	1.1
812	[C] Header name token '<text>' found outside '#include' preprocessing directive.	1.1
813	[U] Using any of the characters ' ' or /* in '#include <%s>' gives undefined behaviour.	19.2
813	[U] Using any of the characters ' ' or /* in '#include <%s>' gives undefined behaviour.	1.2
814	[U] Using the characters ' or /* in '#include "%s"' gives undefined behaviour.	19.2
814	[U] Using the characters ' or /* in '#include "%s"' gives undefined behaviour.	1.2
821	[C] '#include %s' does not identify a header or source file that can be processed.	1.1
828	[L] More than 8 levels of nested conditional inclusion - program does not conform strictly to ISO:C90.	1.1

830	[E] Unrecognized text encountered after a preprocessing directive.	1.1
831	[E] Use of '\ ' in this '#include' line is a PC extension - this usage is non-portable.	19.2
831	[E] Use of '\ ' in this '#include' line is a PC extension - this usage is non-portable.	1.1
834	[C] Function-like macro '%s()' is being redefined as an object-like macro.	1.1
835	[C] Macro '%s' is being redefined with different parameter names.	1.1
836	[U] Definition of macro named 'defined'.	20.1
836	[U] Definition of macro named 'defined'.	1.2
837	[U] Use of '#undef' to remove the operator 'defined'.	1.2
841	Using '#undef'.	19.6
842	Using '#define' or '#undef' inside a function.	19.5
844	[C] Macro '%s' is being redefined with a different replacement list.	1.1
845	[C] Object-like macro '%s' is being redefined as a function-like macro.	1.1
848	[U] Attempting to '#undef '%s'', which is a predefined macro name.	1.2
848	[U] Attempting to '#undef '%s'', which is a predefined macro name.	20.1
850	[C99] Macro argument is empty.	1.1
850	[C99] Macro argument is empty.	19.8
851	[C] More arguments in macro call than specified in definition.	1.1
852	[C] Unable to find the ')' that marks the end of the macro call.	1.1
853	[U] Macro arguments contain a sequence of tokens that has the form of a preprocessing directive.	1.2
853	[U] Macro arguments contain a sequence of tokens that has the form of a preprocessing directive.	19.9
854	[U] Attempting to '#define '%s'', which is a predefined macro name.	1.2
854	[U] Attempting to '#define '%s'', which is a predefined macro name.	20.1
856	[C] Fewer arguments in macro call than specified in definition.	1.1
856	[C] Fewer arguments in macro call than specified in definition.	19.8
857	[L] Number of macro definitions exceeds 1024 - program does not conform strictly to ISO:C90.	1.1
858	[L] Number of macro parameters exceeds 31 - program does not conform strictly to ISO:C90.	1.1
859	[L] Number of arguments in macro call exceeds 31 - program does not conform strictly to ISO:C90.	1.1
864	[U] '#line' directive specifies line number which is not in the range 1 to 32767.	1.2
865	[U] '#line' directive is badly formed.	1.2
866	[C] The string literal in a '#line' directive cannot be a 'wide string literal'.	1.1
867	[U] '#line' has not been followed by a line number.	1.2
872	[U] Result of '##' operator is not a legal preprocessing token.	1.2
873	[C] Preprocessing token cannot be converted to an actual token.	1.1
874	[U] Character string literal and wide character string literal are adjacent.	1.2
875	[L] String literal exceeds 509 characters - program does not conform strictly to ISO:C90.	1.1
877	[C] '#if' and '#elif' expressions may contain only integral constants.	1.1
878	Using wide character or string literals.	3.1
880	Using '#' and '##' operators in the same macro definition.	19.12
881	Using multiple '##' operators in the same macro definition.	19.12
883	Include file code is not protected against repeated inclusion	19.15
884	Using multiple '#' operators in the same macro definition.	19.12
885	[U] The token 'defined' is generated in the expansion of this macro.	19.14
885	[U] The token 'defined' is generated in the expansion of this macro.	1.2
887	[U] Use of 'defined' must match either 'defined(identifier)' or 'defined identifier'.	1.2
887	[U] Use of 'defined' must match either 'defined(identifier)' or 'defined identifier'.	19.14
888	[U] 'defined' requires an identifier as an argument.	1.2
888	[U] 'defined' requires an identifier as an argument.	19.14
899	[E] Unrecognized preprocessing directive has been ignored - assumed to be a language extension.	1.1
914	[U] Source file does not end with a newline character.	1.2
915	[U] Source file ends with a backslash character followed by a newline.	1.2
930	[C99] Trailing comma at the end of an enumerator-list.	1.1
940	[C] Illegal usage of a variably modified type.	1.1
941	[C] A variable length array may not be initialized.	1.1
942	[U] A '*' can only be used to specify array size within function prototype scope.	1.2
943	[C] Jump to label '%s' is a jump into the scope of an identifier with variably modified type.	1.1
944	[C] The label '%s' is inside the scope of an identifier with variably modified type.	1.1
945	[C99] WARNING. Operand of sizeof is an expression of variable length array type.	1.1
1001	[E] '#include '%s' is a VMS extension.	1.1

1002	[E] '%'s' is not a legal identifier in ISO C.	1.1
1003	[E] '#%s' is a language extension for in-line assembler. All statements located between #asm and #endasm will be ignored.	1.1
1006	[E] This in-line assembler construct is a language extension. The code has been ignored.	1.1
1008	[E] '#%s' is not a legal ISO C preprocessing directive.	1.1
1011	[C99] Use of '/' comment.	1.1
1011	[C99] Use of '/' comment.	2.2
1012	[E] Use of a C++ reference type ('type &') will be treated as a language extension.	1.1
1014	[E] Non-standard type specifier - this will be treated as a language extension.	1.1
1015	[E] '%'s' is not a legal keyword in ISO C - this will be treated as a language extension.	1.1
1018	[C99] Use of LL suffix.	1.1
1019	[E] '@ address' is not supported in ISO C - this will be treated as a language extension.	1.1
1020	[E] '__typeof__' is not supported in ISO C, and is treated as a language extension.	1.1
1021	[E] A statement expression is not supported in ISO C, and is treated as a language extension.	1.1
1022	[E] '__alignof__' is not supported in ISO C, and is treated as a language extension.	1.1
1023	[C] Using '__alignof__' on function types is illegal.	1.1
1024	[C] Using '__alignof__' on incomplete types is illegal.	1.1
1025	[C] Using '__alignof__' on bit-fields is illegal.	1.1
1026	[E] The indicated @word construct has been ignored.	1.1
1027	[C99] Use of type 'long long'.	1.1
1028	[E] Use of the sizeof operator in a preprocessing directive is a language extension.	1.1
1029	[E] Whitespace encountered between backslash and new-line has been ignored.	1.1
1030	[C99] Macro defined with variable argument list.	1.1
1031	[C99] Initializer for 'struct', 'union' or array type is not a constant expression.	1.1
1033	[C] The identifier __VA_ARGS__ may only be used in the replacement list of a variadic macro.	1.1
1034	[E] Macro defined with named variable argument list. This is a language extension.	1.1
1035	[E] No macro arguments supplied for variable argument list. This is a language extension.	1.1
1036	[E] Comma before ## ignored in expansion of variadic macro. This is a language extension.	1.1
1037	[E] Arrays of length zero are a language extension.	1.1
1038	[E] The sequence ", ##__VA_ARGS__" is a language extension.	1.1
1041	[E] Empty aggregate initializers are a language extension.	1.1
1042	[E] Using l64 or Ul64 as an integer constant suffix. This is a language extension.	1.1
1043	[E] Defining an anonymous union object. This is a language extension.	1.1
1044	[E] Defining an anonymous struct object. This is a language extension.	1.1
1045	[E] Use of the #include_next preprocessing directive is a language extension.	1.1
1046	[E] Function is being declared with default argument syntax. This is a language extension.	1.1
1047	[C] Function is being declared with default argument syntax after a previous call to the function. This is not allowed.	1.1
1048	[C] Default argument values are missing for some parameters in this function declaration. This is not allowed.	1.1
1051	[C99] A variable length array has been declared.	1.1
1052	[C99] A variable length array of unspecified size has been declared.	1.1
1053	[C99] Designators have been used in this initialization list.	1.1
1054	[C99] A compound literal has been used.	1.1
1055	[C99] The keyword 'inline' has been used.	1.1
1056	[C99] The keyword '_Bool' has been used.	1.1
1256	An integer constant suffixed with L is being converted to type signed or unsigned long long on assignment.	10.1
1257	An integer constant suffixed with L or LL is being converted to a type of lower rank on assignment.	10.1
1264	A suffixed floating constant is being converted to a different floating type on assignment.	10.2
1265	An unsuffixed floating constant is being converted to a different floating type on assignment.	10.2
1266	A floating constant is being converted to integral type on assignment.	10.2
1281	Integer literal constant is of an unsigned type but does not include a "U" suffix.	10.6
1290	An integer constant of 'essentially signed' type is being converted to unsigned type on assignment.	10.1
1291	An integer constant of 'essentially unsigned' type is being converted to signed type on assignment.	10.1
1292	An integer constant of 'essentially signed' type is being converted to type char on assignment.	10.1
1293	An integer constant of 'essentially unsigned' type is being converted to type char on assignment.	10.1
1294	An integer constant of 'essentially signed' type is being converted to type _Bool on assignment.	10.1
1295	An integer constant of 'essentially unsigned' type is being converted to type _Bool on assignment.	10.1
1296	An integer constant of 'essentially signed' type is being converted to enum type on assignment.	10.1

1297	An integer constant of 'essentially unsigned' type is being converted to enum type on assignment.	10.1
1298	An integer constant of 'essentially signed' type is being converted to floating type on assignment.	10.1
1299	An integer constant of 'essentially unsigned' type is being converted to floating type on assignment.	10.1
1317	Value of constant expression is not in the enum type to which it is being converted.	10.1
1330	The parameter identifiers in this function declaration differ from those in a previous declaration.	16.4
1331	Type or number of arguments doesn't match previous use of the function.	8.3
1332	Type or number of arguments doesn't match prototype found later.	8.3
1333	Type or number of arguments doesn't match function definition found later.	8.3
1335	Parameter identifiers missing in function prototype declaration.	16.3
1336	Parameter identifiers missing in declaration of a function type.	16.3
1337	Function defined with a variable number of parameters.	16.1
1460	'Switch' label value, %s, not contained in enum type.	14.1
1461	Value of constant expression is not in the enum type to which it is being converted, but is bitwise OR of constants in the enum type.	10.1
1503	The function '%1s' is defined but is not used within this project.	14.1
1504	The object '%1s' is only referenced in the translation unit where it is defined.	8.10
1505	The function '%1s' is only referenced in the translation unit where it is defined.	8.10
1506	The identifier '%1s' is declared as a typedef and is used elsewhere for a different kind of declaration.	5.3
1507	'%1s' is used as a typedef for different types.	5.3
1508	The typedef '%1s' is declared in more than one location.	5.3
1509	'%1s' has external linkage and has multiple definitions.	8.9
1509	'%1s' has external linkage and has multiple definitions.	1.2
1510	'%1s' has external linkage and has incompatible declarations.	8.4
1510	'%1s' has external linkage and has incompatible declarations.	1.2
1513	Identifier '%1s' with external linkage has separate non-defining declarations in more than one location.	8.8
1514	The object '%1s' is only referenced by function '%2s', in the translation unit where it is defined	8.7
1520	Functions are indirectly recursive.	16.2
1525	Object/function with external linkage has same identifier as another object/function with internal linkage.	5.5
1526	Object with no linkage has same identifier as another object/function with external linkage.	5.5
1527	Object/function with internal linkage has same identifier as another object/function with internal linkage.	5.5
1528	Object with no linkage has same identifier as another object/function with internal linkage.	5.5
1529	Object with no linkage has same identifier as another object with static storage duration but no linkage.	5.5
1800	The %1s operand (essential type: '%2s') will be implicitly converted to a floating type, '%3s', in this arithmetic operation.	10.1
1802	The %1s operand (essential type: '%2s') will be implicitly converted to a floating type, '%3s', in this relational operation.	10.1
1803	The %1s operand (essential type: '%2s') will be implicitly converted to a floating type, '%3s', in this equality operation.	10.1
1804	The %1s operand (essential type: '%2s') will be implicitly converted to a floating type, '%3s', in this conditional operation.	10.1
1810	An operand of 'essentially character' type is being added to another operand of 'essentially character' type.	10.1
1810	An operand of 'essentially character' type is being added to another operand of 'essentially character' type.	6.1
1811	An operand of 'essentially character' type is being subtracted from an operand of 'essentially signed' type.	6.1
1811	An operand of 'essentially character' type is being subtracted from an operand of 'essentially signed' type.	10.1
1812	An operand of 'essentially character' type is being subtracted from an operand of 'essentially unsigned' type.	10.1
1812	An operand of 'essentially character' type is being subtracted from an operand of 'essentially unsigned' type.	6.1
1813	An operand of 'essentially character' type is being balanced with an operand of 'essentially floating' type in this arithmetic operation.	10.1
1813	An operand of 'essentially character' type is being balanced with an operand of 'essentially floating' type in this arithmetic operation.	6.1
1820	The %1s operand is non-constant and 'essentially signed' (%2s) but will be implicitly converted to	10.1

	an unsigned type (%3s) in this arithmetic operation.	
1821	The %1s operand is non-constant and 'essentially signed' (%2s) but will be implicitly converted to an unsigned type (%3s) in this bitwise operation.	10.1
1822	The %1s operand is non-constant and 'essentially signed' (%2s) but will be implicitly converted to an unsigned type (%3s) in this relational operation.	10.1
1823	The %1s operand is non-constant and 'essentially signed' (%2s) but will be implicitly converted to an unsigned type (%3s) in this equality operation.	10.1
1824	The %1s operand is non-constant and 'essentially signed' (%2s) but will be implicitly converted to an unsigned type (%3s) in this conditional operation.	10.1
1830	The %1s operand is constant, 'essentially signed' (%2s) and negative but will be implicitly converted to an unsigned type (%3s) in this arithmetic operation.	10.1
1831	The %1s operand is constant, 'essentially signed' (%2s) and negative but will be implicitly converted to an unsigned type (%3s) in this bitwise operation.	10.1
1832	The %1s operand is constant, 'essentially signed' (%2s) and negative but will be implicitly converted to an unsigned type (%3s) in this relational operation.	10.1
1833	The %1s operand is constant, 'essentially signed' (%2s) and negative but will be implicitly converted to an unsigned type (%3s) in this equality operation.	10.1
1834	The %1s operand is constant, 'essentially signed' (%2s) and negative but will be implicitly converted to an unsigned type (%3s) in this conditional operation.	10.1
1840	The %1s operand is constant, 'essentially signed' (%2s) and non-negative but will be implicitly converted to an unsigned type (%3s) in this arithmetic operation.	10.1
1841	The %1s operand is constant, 'essentially signed' (%2s) and non-negative but will be implicitly converted to an unsigned type (%3s) in this bitwise operation.	10.1
1842	The %1s operand is constant, 'essentially signed' (%2s) and non-negative but will be implicitly converted to an unsigned type (%3s) in this relational operation.	10.1
1843	The %1s operand is constant, 'essentially signed' (%2s) and non-negative but will be implicitly converted to an unsigned type (%3s) in this equality operation.	10.1
1844	The %1s operand is constant, 'essentially signed' (%2s) and non-negative but will be implicitly converted to an unsigned type (%3s) in this conditional operation.	10.1
1850	The %1s operand is 'essentially unsigned' (%2s) but will be implicitly converted to a signed type (%3s) in this arithmetic operation.	10.1
1851	The %1s operand is 'essentially unsigned' (%2s) but will be implicitly converted to a signed type (%3s) in this bitwise operation.	10.1
1852	The %1s operand is 'essentially unsigned' (%2s) but will be implicitly converted to a signed type (%3s) in this relational operation.	10.1
1853	The %1s operand is 'essentially unsigned' (%2s) but will be implicitly converted to a signed type (%3s) in this equality operation.	10.1
1854	The %1s operand is 'essentially unsigned' (%2s) but will be implicitly converted to a signed type (%3s) in this conditional operation.	10.1
1860	The operands of this arithmetic operator are of different 'essential signedness' but will generate a result of type 'signed int'.	10.1
1861	The operands of this bitwise operator are of different 'essential signedness' but will generate a result of type 'signed int'.	10.1
1862	The operands of this relational operator are of different 'essential signedness' but will both be promoted to 'signed int' for comparison.	10.1
1863	The operands of this equality operator are of different 'essential signedness' but will both be promoted to 'signed int' for comparison.	10.1
1864	The 2nd and 3rd operands of this conditional operator are of different 'essential signedness'. The result will be in the promoted type 'signed int'.	10.1
1880	The operands of this relational operator are expressions of different 'essential type' categories (%1s and %2s).	10.1
1880	The operands of this relational operator are expressions of different 'essential type' categories (%1s and %2s).	10.2
1881	The operands of this equality operator are expressions of different 'essential type' categories (%1s and %2s).	10.1
1881	The operands of this equality operator are expressions of different 'essential type' categories (%1s and %2s).	10.2
1882	The 2nd and 3rd operands of this conditional operator are expressions of different 'essential type' categories (%1s and %2s).	10.2
1882	The 2nd and 3rd operands of this conditional operator are expressions of different 'essential type' categories (%1s and %2s).	10.1
1890	A composite expression of 'essentially signed' type (%1s) is being implicitly converted to a wider signed type, '%2s'.	10.1
1891	A composite expression of 'essentially unsigned' type (%1s) is being implicitly converted to a wider unsigned type, '%2s'.	10.1

1892	A composite expression of 'essentially floating' type (%1s) is being implicitly converted to a wider floating type, %2s'.	10.2
1893	The 2nd and 3rd operands of this conditional operator are both 'essentially signed' (%1s' and %2s') but one is a composite expression of a narrower type than the other.	10.2
1894	The 2nd and 3rd operands of this conditional operator are both 'essentially unsigned' (%1s' and %2s') but one is a composite expression of a narrower type than the other.	10.2
1895	The 2nd and 3rd operands of this conditional operator are both 'essentially floating' (%1s' and %2s') but one is a composite expression of a narrower type than the other.	10.2
2001	A 'goto' statement has been used.	14.4
2002	No 'default' label found in this 'switch' statement.	15.3
2003	The preceding 'switch' clause is not empty and does not end with a 'jump' statement. Execution will fall through.	15.2
2004	No concluding 'else' exists in this 'if'-else'-if' statement.	14.10
2008	Code statements precede the first label in this 'switch' construct.	14.1
2009	This 'default' label is not the final 'case' label within the 'switch' block.	15.3
2019	'Switch' label is located within a nested code block.	15.1
2020	Final 'switch' clause does not end with an explicit 'jump' statement.	15.2
2050	The 'int' type specifier has been omitted from a function declaration.	8.2
2051	The 'int' type specifier has been omitted from an object declaration.	8.2
2212	Body of control statement is not enclosed within braces.	14.9
2212	Body of control statement is not enclosed within braces.	14.8
2214	Body of control statement is on the same line and is not enclosed within braces.	14.9
2214	Body of control statement is on the same line and is not enclosed within braces.	14.8
2462	The variable initialized in the first expression of this 'for' statement is not the variable identified as the 'loop control variable' (%s).	13.5
2463	The variable incremented in the third expression of this 'for' statement is not the variable identified as the 'loop control variable' (%s).	13.5
2469	Loop control variable in this 'for' statement, %s, is modified in the body of the loop.	13.6
2547	This declaration of tag '%s' hides a more global declaration.	5.2
2742	This 'if' controlling expression is a constant expression and its value is 'false'.	14.1
2744	This 'while' or 'for' loop controlling expression is a constant expression and its value is 'false'. The loop will not be entered.	14.1
2771	Definite: These pointers address different objects.	17.3
2771	Definite: These pointers address different objects.	17.2
2772	Apparent: These pointers address different objects.	17.2
2772	Apparent: These pointers address different objects.	17.3
2776	Definite: Copy between overlapping objects.	18.2
2777	Apparent: Copy between overlapping objects.	18.2
2790	Constant: Right hand operand of shift operator is negative or too large.	12.8
2791	Definite: Right hand operand of shift operator is negative or too large.	21.1
2792	Apparent: Right hand operand of shift operator is negative or too large.	21.1
2800	Constant: Overflow in signed arithmetic operation.	1.2
2801	Definite: Overflow in signed arithmetic operation.	21.1
2802	Apparent: Overflow in signed arithmetic operation.	21.1
2810	Constant: Dereference of NULL pointer.	1.2
2810	Constant: Dereference of NULL pointer.	20.3
2811	Definite: Dereference of NULL pointer.	21.1
2811	Definite: Dereference of NULL pointer.	20.3
2812	Apparent: Dereference of NULL pointer.	20.3
2812	Apparent: Dereference of NULL pointer.	21.1
2820	Constant: Arithmetic operation on NULL pointer.	1.2
2821	Definite: Arithmetic operation on NULL pointer.	21.1
2822	Apparent: Arithmetic operation on NULL pointer.	21.1
2830	Constant: Division by zero.	1.2
2831	Definite: Division by zero.	21.1
2832	Apparent: Division by zero.	21.1
2840	Constant: Dereference of an invalid pointer value.	20.3
2840	Constant: Dereference of an invalid pointer value.	1.2
2841	Definite: Dereference of an invalid pointer value.	20.3
2841	Definite: Dereference of an invalid pointer value.	21.1

2842	Apparent: Dereference of an invalid pointer value.	20.3
2842	Apparent: Dereference of an invalid pointer value.	21.1
2845	Constant: Maximum number of characters to be written is larger than the target buffer size.	21.1
2846	Definite: Maximum number of characters to be written is larger than the target buffer size.	21.1
2847	Apparent: Maximum number of characters to be written is larger than the target buffer size.	21.1
2850	Constant: Implicit conversion to a signed integer type of insufficient size.	3.1
2851	Definite: Implicit conversion to a signed integer type of insufficient size.	3.1
2852	Apparent: Implicit conversion to a signed integer type of insufficient size.	3.1
2853	Suspicious: Implicit conversion to a signed integer type of insufficient size.	3.1
2855	Constant: Casting to a signed integer type of insufficient size.	3.1
2856	Definite: Casting to a signed integer type of insufficient size.	3.1
2857	Apparent: Casting to a signed integer type of insufficient size.	3.1
2860	Constant: Implementation-defined value resulting from left shift operation on expression of signed type.	3.1
2861	Definite: Implementation-defined value resulting from left shift operation on expression of signed type.	3.1
2862	Apparent: Implementation-defined value resulting from left shift operation on expression of signed type.	3.1
2871	Infinite loop identified.	21.1
2872	This loop, if entered, will never terminate.	21.1
2877	This loop will never be executed more than once.	21.1
2880	This code is unreachable.	14.1
2882	This 'switch' statement will bypass the initialization of local variables.	14.1
2883	This 'goto' statement will always bypass the initialization of local variables.	9.1
2887	Function 'main' ends with an implicit 'return' statement.	16.8
2888	This function has been declared with a non-void 'return' type but ends with an implicit 'return ;' statement.	16.8
2889	This function has more than one 'return' path.	14.7
2890	Constant: Negative value implicitly converted to an unsigned type.	3.1
2891	Definite: Negative value implicitly converted to an unsigned type.	21.1
2892	Apparent: Negative value implicitly converted to an unsigned type.	21.1
2895	Constant: Negative value cast to an unsigned type.	3.1
2896	Definite: Negative value cast to an unsigned type.	21.1
2897	Apparent: Negative value cast to an unsigned type.	21.1
2900	Constant: Positive integer value truncated by implicit conversion to a smaller unsigned type.	10.1
2901	Definite: Positive integer value truncated by implicit conversion to a smaller unsigned type.	21.1
2902	Apparent: Positive integer value truncated by implicit conversion to a smaller unsigned type.	21.1
2910	Constant: Wraparound in unsigned arithmetic operation.	12.11
2911	Definite: Wraparound in unsigned arithmetic operation.	21.1
2912	Apparent: Wraparound in unsigned arithmetic operation.	21.1
2930	Constant: Computing an invalid pointer value.	17.1
2931	Definite: Computing an invalid pointer value.	17.1
2932	Apparent: Computing an invalid pointer value.	17.1
2961	Definite: Using value of uninitialized automatic object '%s'.	9.1
2962	Apparent: Using value of uninitialized automatic object '%s'.	9.1
2971	Definite: Passing address of uninitialized object '%s' to a function parameter declared as a pointer to const.	9.1
2972	Apparent: Passing address of uninitialized object '%s' to a function parameter declared as a pointer to const.	9.1
2980	The value of this function parameter is never used before being modified.	21.1
2981	This initialization is redundant. The value of this object is never used before being modified.	21.1
2982	This assignment is redundant. The value of this object is never used before being modified.	21.1
2983	This assignment is redundant. The value of this object is never subsequently used.	21.1
2984	This operation is redundant. The value of the result is always '%1s'.	21.1
2985	This operation is redundant. The value of the result is always that of the left-hand operand.	21.1
2986	This operation is redundant. The value of the result is always that of the right-hand operand.	21.1
2990	The value of this loop controlling expression is always 'true'.	13.7
2991	The value of this 'if' controlling expression is always 'true'.	13.7
2992	The value of this 'if' controlling expression is always 'false'.	13.7
2993	The value of this 'do - while' loop controlling expression is always 'false'. The loop will only be	13.7

	executed once.	
2994	The value of this 'while' or 'for' loop controlling expression is always 'false'. The loop will not be entered.	13.7
2995	The result of this logical operation is always 'true'.	13.7
2996	The result of this logical operation is always 'false'.	13.7
3001	Function has been declared with an empty parameter list.	16.5
3002	Defining '%s()' with an identifier list and separate parameter declarations is an obsolescent feature.	8.1
3006	This function contains a mixture of in-line assembler statements and C statements.	2.1
3007	"void" has been omitted when defining a function with no parameters.	16.5
3101	Unary '-' applied to an operand of type unsigned int or unsigned long gives an unsigned result.	12.9
3102	Unary '-' applied to an operand whose underlying type is unsigned.	12.9
3108	Nested comments are not recognized in the ISO standard.	2.3
3110	The left-hand operand of this ',' has no side effects.	14.2
3112	This statement has no side-effect - it can be removed.	14.2
3113	[U] 'return' statement includes no expression but function '%s()' is implicitly of type 'int'.	16.8
3113	[U] 'return' statement includes no expression but function '%s()' is implicitly of type 'int'.	1.2
3114	[U] Function '%s()' is implicitly of type 'int' but ends without returning a value.	16.8
3114	[U] Function '%s()' is implicitly of type 'int' but ends without returning a value.	1.2
3115	Unrecognized preprocessing directive has been ignored because of conditional inclusion directives.	19.16
3116	Unrecognized #pragma arguments '%s' This #pragma directive has been ignored.	3.4
3138	Null statement is located close to other code or comments.	14.3
3200	'%s' returns a value which is not being used.	16.10
3217	Address of automatic object exported to a pointer with linkage or wider scope.	17.6
3218	File scope static, '%s', is only accessed in one function.	8.7
3219	Static function '%s()' is not used within this translation unit.	14.1
3221	Function with external linkage declared at block scope.	8.6
3222	Object with external linkage declared at block scope.	8.8
3224	This identifier has previously been declared with internal linkage but is not declared here with the static storage class specifier.	8.11
3225	Address of automatic object exported using a function parameter.	17.6
3230	Address of automatic object assigned to local pointer with static storage duration.	17.6
3234	Declarations precede the first label in this 'switch' construct.	15.0
3236	[C] 'inline' may not be applied to function 'main'.	1.1
3237	[C] inline function '%1s' has external linkage and is defining an object, '%2s', with static storage duration.	1.1
3238	[C] inline function '%1s' has external linkage and is referring to an object, '%2s', with internal linkage.	1.1
3239	[U] inline function '%1s' has external linkage, but is not defined within this translation unit.	1.2
3244	[C] 'inline' may only be used in the declaration of a function identifier.	1.1
3260	Typedef defined with more than 2 levels of indirection.	17.5
3261	Member of struct/union defined with more than 2 levels of indirection.	17.5
3262	Object defined or declared with more than 2 levels of indirection.	17.5
3263	Function defined or declared with a return type which has more than 2 levels of indirection.	17.5
3307	The operand of 'sizeof' is an expression with implied side effects, but they will not be evaluated.	12.3
3311	[u] An earlier jump to this statement will bypass the initialization of local variables.	1.2
3312	[u] This goto statement will jump into a previous block and bypass the initialization of local variables.	1.2
3315	This 'switch' statement contains only a single path - it is redundant.	15.5
3317	'#if...' not matched by '#endif' in included file. This is probably an error.	19.17
3318	'#else'/'#elif'/'#endif' in included file matched '#if...' in parent file. This is probably an error.	19.17
3319	[U] Function called with number of arguments which differs from number of parameters in definition.	16.6
3319	[U] Function called with number of arguments which differs from number of parameters in definition.	1.2
3320	Type of argument no. %s differs from its type in definition of function.	8.3
3322	Operand of a logical ! operator is a constant expression which is not a 'Boolean' value.	12.6
3326	The result of an assignment is being used in a logical operation.	13.1
3332	The macro '%s' used in this '#if' or '#elif' expression is not defined.	19.11
3334	This declaration of '%s' hides a more global declaration.	5.2
3335	No function declaration. Implicit declaration inserted: 'extern int %s();'.	8.1

3340	Floating point variable used as 'for' loop control variable.	13.4
3341	Comparing floating point expressions for equality (with '==' or '!=').	13.3
3342	Controlling expression of 'for' loop is a floating point comparison.	13.4
3344	Controlling expression is not an 'essentially Boolean' expression.	13.2
3377	Operand of a logical && or operator is a constant expression which is not a 'Boolean' value.	12.6
3389	Extra parentheses recommended to clarify the ordering of a % operator and another arithmetic operator (* / % + -).	12.1
3391	Extra parentheses recommended. A conditional operation is the operand of another conditional operator.	12.1
3392	Extra parentheses recommended. A shift, relational or equality operation is the operand of a second identical operator.	12.1
3393	Extra parentheses recommended. An arithmetic operation (* / + -) is the operand of a different operator with the same precedence.	12.1
3394	Extra parentheses recommended. A shift, relational or equality operation is the operand of a different operator with the same precedence.	12.1
3395	Extra parentheses recommended. A * or / operation is the operand of a + or - operator.	12.1
3396	Extra parentheses recommended. A binary operation is the operand of a conditional operator.	12.1
3397	Extra parentheses recommended. A binary operation is the operand of a binary operator with different precedence.	12.1
3398	Extra parentheses recommended. A function call, array subscript, or member operation is the operand of a logical && or .	12.5
3399	Extra parentheses recommended. A unary operation is the operand of a logical && or .	12.5
3400	Extra parentheses recommended. A binary operation is the operand of a logical && or .	12.5
3402	Braces are needed to clarify the structure of this 'if'-'if'-'else' statement.	14.9
3406	Object/function '%s', with external linkage, has been defined in a header file.	8.5
3408	'%s' has external linkage and is being defined without any previous declaration.	8.8
3409	The replacement list of function-like macro '%s' is not enclosed in ().	19.4
3410	Macro parameter not enclosed in ().	19.10
3411	Macro defined with unbalanced brackets, parentheses or braces.	19.4
3412	Macro defines an unrecognized code-fragment.	19.4
3413	Macro definition could be replaced by a typedef.	19.4
3415	Right hand operand of '&&' or ' ' is an expression with possible side effects.	12.4
3417	The comma operator has been used outside a 'for' statement.	12.10
3418	The comma operator has been used in a 'for' statement.	12.10
3425	One branch of this conditional operation is a redundant expression.	14.2
3426	Right hand side of comma expression has no side effect and its value is not used.	14.2
3427	Right hand side of logical operator has no side effect and its value is not used.	14.2
3431	Macro defines an operator, a punctuator or a control statement keyword.	19.4
3437	[u] The assert macro has been suppressed to call a function of that name.	1.2
3438	[U] #undef'ing the assert macro to call a function of that name causes undefined behaviour.	1.2
3439	Macro redefines a keyword.	20.1
3440	Using the value resulting from a ++ or -- operation.	12.13
3447	'%s' is being declared with external linkage but this declaration is not in a header file.	8.8
3448	Declaration of typedef '%s' is not in a header file although it is used in a definition or declaration with external linkage.	5.3
3450	Function '%s', with internal linkage, is being defined without a previous declaration.	8.1
3451	The global identifier '%s' has been declared in more than one file.	8.8
3452	The replacement list of object-like macro '%s' is not enclosed in ().	19.4
3453	A function could probably be used instead of this function-like macro.	19.7
3458	Macro defines a braced code statement block.	19.4
3460	Macro defines a type specifier keyword.	19.4
3461	Macro defines a storage-class specifier/type qualifier sequence.	19.4
3480	Object/function '%s', with internal linkage, has been defined in a header file.	8.5
3601	Trigraphs (??x) are an ISO feature.	4.2
3610	Hexadecimal escape sequence used.	4.1
3628	Octal escape sequences used in a character constant or string literal.	7.1
3629	Union contains member of floating type.	12.12
3635	Function identifier used as a pointer without a preceding & operator.	16.9
3659	Unnamed zero-width bit-field declared with a signed type.	6.5
3660	Named bit-field consisting of a single bit declared with a signed type.	6.5

3664	[E] Using a dot operator to access an individual bit is a language extension.	1.1
3665	Unnamed bit-field consisting of a single bit declared with a signed type.	6.5
3670	Recursive call to function containing this call.	16.2
3673	The object addressed by the pointer parameter '%s' is not modified and so the pointer could be of type 'pointer to const'.	16.7
3675	Function parameter declared with type qualification which differs from previous declaration.	8.3
3684	Array declared with unknown size.	8.12
4101	Both operands of & operator are 'Boolean' expressions.	12.6
4102	Both operands of operator are 'Boolean' expressions.	12.6
4103	Both operands of arithmetic or bitwise operator are 'Boolean' expressions.	12.6
4104	Left hand operand of arithmetic or bitwise operator is a 'Boolean' expression.	12.6
4105	Right hand operand of arithmetic or bitwise operator is a 'Boolean' expression.	12.6
4106	Both operands of && operator are arithmetic or bitwise expressions.	12.6
4107	Both operands of operator are arithmetic or bitwise expressions.	12.6
4108	Left hand operand of logical operator is an arithmetic or bitwise expression.	12.6
4109	Right hand operand of logical operator is an arithmetic or bitwise expression.	12.6
4110	Operand of ! operator is an arithmetic or bitwise expression.	12.6
4111	Right hand operand of relational operator is a 'Boolean' expression.	12.6
4112	Left hand operand of relational operator is a 'Boolean' expression.	12.6
4113	Both operands of relational operator are 'Boolean' expressions.	12.6
4114	Operand of ~ operator is a 'Boolean' expression.	12.6
4115	Operand of logical && or operator is not an 'essentially Boolean' expression.	12.6
4116	Operand of logical ! operator is not an 'essentially Boolean' expression.	12.6
4117	Result of integer division operation implicitly converted to a floating type.	10.1
4118	Result of integer division operation cast to a floating type.	10.3
4140	Address of automatic object exported in function return value.	17.6
4390	A composite expression of 'essentially signed' type (%1s) is being cast to a wider signed type, '%2s'.	10.3
4391	A composite expression of 'essentially unsigned' type (%1s) is being cast to a wider unsigned type, '%2s'.	10.3
4392	A composite expression of 'essentially floating' type (%1s) is being cast to a wider floating type, '%2s'.	10.4
4393	A composite expression of 'essentially signed' type (%1s) is being cast to a different type category, '%2s'.	10.3
4394	A composite expression of 'essentially unsigned' type (%1s) is being cast to a different type category, '%2s'.	10.3
4395	A composite expression of 'essentially floating' type (%1s) is being cast to a different type category, '%2s'.	10.4
4397	An expression which is the result of a ~ or << operation has not been cast to its essential type.	10.5
4398	An expression which is the result of a ~ or << operation has been cast to a different essential type category.	10.5
4399	An expression which is the result of a ~ or << operation has been cast to a wider type.	10.5
4401	An expression of 'essentially Boolean' type (%1s) is being converted to character type, '%2s' on assignment.	6.1
4401	An expression of 'essentially Boolean' type (%1s) is being converted to character type, '%2s' on assignment.	10.1
4402	An expression of 'essentially Boolean' type (%1s) is being converted to enum type, '%2s' on assignment.	10.1
4403	An expression of 'essentially Boolean' type (%1s) is being converted to signed type, '%2s' on assignment.	10.1
4404	An expression of 'essentially Boolean' type (%1s) is being converted to unsigned type, '%2s' on assignment.	10.1
4405	An expression of 'essentially Boolean' type (%1s) is being converted to floating type, '%2s' on assignment.	10.1
4410	An expression of 'essentially character' type (%1s) is being converted to Boolean type, '%2s' on assignment.	10.1
4412	An expression of 'essentially character' type (%1s) is being converted to enum type, '%2s' on assignment.	10.1
4413	An expression of 'essentially character' type (%1s) is being converted to signed type, '%2s' on assignment.	10.1
4413	An expression of 'essentially character' type (%1s) is being converted to signed type, '%2s' on assignment.	6.2

4414	An expression of 'essentially character' type (%1s) is being converted to unsigned type, '%2s' on assignment.	10.1
4414	An expression of 'essentially character' type (%1s) is being converted to unsigned type, '%2s' on assignment.	6.2
4415	An expression of 'essentially character' type (%1s) is being converted to floating type, '%2s' on assignment.	10.1
4420	An expression of 'essentially enum' type (%1s) is being converted to Boolean type, '%2s' on assignment.	10.1
4421	An expression of 'essentially enum' type (%1s) is being converted to character type, '%2s' on assignment.	10.1
4421	An expression of 'essentially enum' type (%1s) is being converted to character type, '%2s' on assignment.	6.1
4422	An expression of 'essentially enum' type (%1s) is being converted to a different enum type, '%2s' on assignment.	10.1
4423	An expression of 'essentially enum' type (%1s) is being converted to signed type, '%2s' on assignment.	10.1
4424	An expression of 'essentially enum' type (%1s) is being converted to unsigned type, '%2s' on assignment.	10.1
4425	An expression of 'essentially enum' type (%1s) is being converted to floating type, '%2s' on assignment.	10.1
4430	An expression of 'essentially signed' type (%1s) is being converted to Boolean type, '%2s' on assignment.	10.1
4431	An expression of 'essentially signed' type (%1s) is being converted to character type, '%2s' on assignment.	6.1
4431	An expression of 'essentially signed' type (%1s) is being converted to character type, '%2s' on assignment.	10.1
4432	An expression of 'essentially signed' type (%1s) is being converted to enum type, '%2s' on assignment.	10.1
4434	A non-constant expression of 'essentially signed' type (%1s) is being converted to unsigned type, '%2s' on assignment.	10.1
4435	A non-constant expression of 'essentially signed' type (%1s) is being converted to floating type, '%2s' on assignment.	10.1
4436	A constant expression of 'essentially signed' type (%1s) is being converted to unsigned type, '%2s' on assignment.	10.1
4437	A constant expression of 'essentially signed' type (%1s) is being converted to floating type, '%2s' on assignment.	10.1
4440	An expression of 'essentially unsigned' type (%1s) is being converted to Boolean type, '%2s' on assignment.	10.1
4441	An expression of 'essentially unsigned' type (%1s) is being converted to character type, '%2s' on assignment.	10.1
4441	An expression of 'essentially unsigned' type (%1s) is being converted to character type, '%2s' on assignment.	6.1
4442	An expression of 'essentially unsigned' type (%1s) is being converted to enum type, '%2s' on assignment.	10.1
4443	A non-constant expression of 'essentially unsigned' type (%1s) is being converted to a wider signed type, '%2s' on assignment.	10.1
4445	An expression of 'essentially unsigned' type (%1s) is being converted to floating type, '%2s' on assignment.	10.1
4446	A non-constant expression of 'essentially unsigned' type (%1s) is being converted to signed type, '%2s' on assignment.	10.1
4447	A constant expression of 'essentially unsigned' type (%1s) is being converted to signed type, '%2s' on assignment.	10.1
4450	An expression of 'essentially floating' type (%1s) is being converted to Boolean type, '%2s' on assignment.	10.2
4451	An expression of 'essentially floating' type (%1s) is being converted to character type, '%2s' on assignment.	6.1
4451	An expression of 'essentially floating' type (%1s) is being converted to character type, '%2s' on assignment.	10.1
4452	An expression of 'essentially floating' type (%1s) is being converted to enum type, '%2s' on assignment.	10.2
4453	An expression of 'essentially floating' type (%1s) is being converted to signed type, '%2s' on assignment.	10.2
4454	An expression of 'essentially floating' type (%1s) is being converted to unsigned type, '%2s' on assignment.	10.2
4460	A non-constant expression of 'essentially signed' type (%1s) is being converted to narrower signed	10.1

	type, '%2s' on assignment.	
4461	A non-constant expression of 'essentially unsigned' type (%1s) is being converted to narrower unsigned type, '%2s' on assignment.	10.1
4462	A non-constant expression of 'essentially floating' type (%1s) is being converted to narrower floating type, '%2s' on assignment.	10.2
4463	A constant expression of 'essentially signed' type (%1s) is being converted to narrower signed type, '%2s' on assignment.	10.1
4464	A constant expression of 'essentially unsigned' type (%1s) is being converted to narrower unsigned type, '%2s' on assignment.	10.1
4465	A constant expression of 'essentially floating' type (%1s) is being converted to narrower floating type, '%2s' on assignment.	10.2
4470	A non-constant expression of 'essentially signed' type (%1s) is being passed to a function parameter of wider signed type, '%2s'.	10.1
4471	A non-constant expression of 'essentially unsigned' type (%1s) is being passed to a function parameter of wider unsigned type, '%2s'.	10.1
4472	A non-constant expression of 'essentially floating' type (%1s) is being passed to a function parameter of wider floating type, '%2s'.	10.2
4480	A non-constant expression of 'essentially signed' type (%1s) is being returned from a function defined with a wider signed return type, '%2s'.	10.1
4481	A non-constant expression of 'essentially unsigned' type (%1s) is being returned from a function defined with a wider unsigned return type, '%2s'.	10.1
4482	A non-constant expression of 'essentially floating' type (%1s) is being returned from a function defined with a wider floating return type, '%2s'.	10.2
4490	A composite expression of 'essentially signed' type (%1s) is being converted to wider signed type, '%2s' on assignment.	10.1
4491	A composite expression of 'essentially unsigned' type (%1s) is being converted to wider unsigned type, '%2s' on assignment.	10.1
4492	A composite expression of 'essentially floating' type (%1s) is being converted to wider floating type, '%2s' on assignment.	10.2
4498	An expression which is the result of a ~ or << operation has been converted to a different essential type category on assignment.	10.5
4499	An expression which is the result of a ~ or << operation has been converted to a wider essential type on assignment.	10.5
4500	An expression of 'essentially Boolean' type (%1s) is being used as an array subscript.	10.1
4501	An expression of 'essentially Boolean' type (%1s) is being used as the %2s operand of this arithmetic operator (%3s).	10.1
4502	An expression of 'essentially Boolean' type (%1s) is being used as the %2s operand of this bitwise operator (%3s).	10.1
4503	An expression of 'essentially Boolean' type (%1s) is being used as the left-hand operand of this shift operator (%2s).	10.1
4504	An expression of 'essentially Boolean' type (%1s) is being used as the right-hand operand of this shift operator (%2s).	10.1
4505	An expression of 'essentially Boolean' type (%1s) is being used as the %2s operand of this relational operator (%3s).	10.1
4507	An expression of 'essentially Boolean' type (%1s) is being used as the operand of this increment/decrement operator (%2s).	10.1
4510	An expression of 'essentially character' type (%1s) is being used as an array subscript.	6.1
4511	An expression of 'essentially character' type (%1s) is being used as the %2s operand of this arithmetic operator (%3s).	6.1
4512	An expression of 'essentially character' type (%1s) is being used as the %2s operand of this bitwise operator (%3s).	6.1
4513	An expression of 'essentially character' type (%1s) is being used as the left-hand operand of this shift operator (%2s).	6.1
4514	An expression of 'essentially character' type (%1s) is being used as the right-hand operand of this shift operator (%2s).	6.1
4517	An expression of 'essentially character' type (%1s) is being used as the operand of this increment/decrement operator (%2s).	6.1
4518	An expression of 'essentially character' type (%1s) is being used as the %2s operand of this logical operator (%3s).	6.1
4519	An expression of 'essentially character' type (%1s) is being used as the first operand of this conditional operator (%2s).	6.1
4528	An expression of 'essentially enum' type (%1s) is being used as the %2s operand of this logical operator (%3s).	13.2
4529	An expression of 'essentially enum' type (%1s) is being used as the first operand of this conditional	13.2

	operator (%2s).	
4532	An expression of 'essentially signed' type (%1s) is being used as the %2s operand of this bitwise operator (%3s).	12.7
4533	An expression of 'essentially signed' type (%1s) is being used as the left-hand operand of this shift operator (%2s).	12.7
4538	An expression of 'essentially signed' type (%1s) is being used as the %2s operand of this logical operator (%3s).	13.2
4539	An expression of 'essentially signed' type (%1s) is being used as the first operand of this conditional operator (%2s).	13.2
4548	A non-negative constant expression of 'essentially signed' type (%1s) is being used as the %2s operand of this logical operator (%3s).	13.2
4549	A non-negative constant expression of 'essentially signed' type (%1s) is being used as the first operand of this conditional operator (%2s).	13.2
4558	An expression of 'essentially unsigned' type (%1s) is being used as the %2s operand of this logical operator (%3s).	13.2
4559	An expression of 'essentially unsigned' type (%1s) is being used as the first operand of this conditional operator (%2s).	13.2
4568	An expression of 'essentially floating' type (%1s) is being used as the %2s operand of this logical operator (%3s).	13.2
4569	An expression of 'essentially floating' type (%1s) is being used as the first operand of this conditional operator (%2s).	13.2
4600	The macro '%1s' is also defined in '<%2s>'.	20.1
4601	The macro '%1s' is the name of an identifier in '<%2s>'.	20.1
4602	The identifier '%1s' is declared as a macro in '<%2s>'.	20.2
4603	The object/function '%1s' is being defined with the same name as an ordinary identifier defined in '<%2s>'.	20.2
4604	The object/function '%1s' is being declared with the same name as an ordinary identifier defined in '<%2s>'.	20.2

5125	The library functions atof, atoi and atol from library <stdlib.h> shall not be used.	20.10
5126	The library functions abort, exit, getenv and system from library <stdlib.h> shall not be used.	20.11
5127	The time handling functions of library <time.h> shall not be used.	20.12

Unused QAC Messages

This table lists all QAC messages that are not referenced in the M2CM-3.2-QAC-8.1.2 compliance module.

Msg No	Message
9	[Q] The length of this preprocessed source code line has exceeded the size of an internal buffer.
40	[Q] Definition of size_t differs from configured type.
41	[Q] Definition of ptrdiff_t differs from configured type.
42	[Q] Definition of wchar_t differs from configured type.
97	Recoverable dataflow problem. Analysis continues. Please inform Programming Research.
159	[Q] The maximum number of errors set by -maxerr has been exceeded - the analysis has been aborted.
231	[S] Character constant contains an invalid hex escape sequence.
234	[S] String literal contains an invalid hex escape sequence.
245	[S] Empty character constant.
249	[S] Character constant contains a new-line character.
250	[S] Character constant contains a single backslash character.

251 [S] Character constant contains a trigraph representation of a single backslash character.

257 [S] String literal is not terminated. A trigraph has been used in the construction of an escape sequence.

258 [S] String literal is not terminated. A backslash character has been used to define an escape sequence.

259 [S] String literal is not terminated.

268 [S] Comment open at end of translation unit.

269 [S] Unexpected end of file.

271 [U] Left shift operation on constant signed expression generating an undefined value.

272 [I] Apparent conversion of integer expression to a signed integer type which cannot represent the value.

273 [I] Definite conversion of integer expression to a signed integer type which cannot represent the value.

274 [I] Implicit conversion of integer constant expression to a signed integer type which cannot represent the value.

277 Implicit conversion of a constant negative value to an unsigned type.

278 [C] Overflow in signed arithmetic operation on constant operands.

280 Implicit conversion of constant negative value which assumes a two's complement representation of signed values.

281 Definite use of a negative value which assumes a two's complement representation of signed values.

282 Apparent use of a negative value which assumes a two's complement implementation of signed values.

290 Definite conversion of a negative value to an unsigned type.

291 Apparent conversion of a negative value to an unsigned type.

294 [U] Definite signed left shift operation generating an undefined value.

295 [U] Apparent signed left shift operation generating an undefined value.

296 [U] Definite overflow in signed arithmetic operation.

297 [U] Apparent overflow in signed arithmetic operation.

314 [I] Cast from a pointer to object type to a pointer to void.

315 [I] Implicit conversion from a pointer to object type to a pointer to void.

318 Redundant type qualifier used in cast

340 Using the '#error' preprocessing directive.

343 Using string literal concatenation.

344 Using function prototype syntax.

345 Using the keyword 'void'.

346 Using one of the keywords 'signed', 'const' or 'volatile'.

347 Using 'extern' in the definition of a global variable.

348 Using a bit-field.

349 Using the unary '+' operator.

350 Using the keyword 'enum'.

351 Using an initializer when defining an automatic object of struct, union or array type.

352 Using the '#elif' preprocessing directive.

371 [L] Nesting levels of blocks exceeds 127 - program does not conform strictly to ISO:C99.

372 [L] More than 63 levels of nested conditional inclusion - program does not conform strictly to ISO:C99.

375 [L] Nesting of parenthesized expressions exceeds 63 - program does not conform strictly to ISO:C99.

380 [L] Number of macro definitions exceeds 4095 - program does not conform strictly to ISO:C99.

388 [L] '#include "%s"' causes nesting to exceed 15 levels - program does not conform strictly to ISO:C99.

390 [L] Number of members in 'struct' or 'union' exceeds 1023 - program does not conform strictly to ISO:C99.

391 [L] Number of enumeration constants exceeds 1023 - program does not conform strictly to ISO:C99.

392 [L] Nesting of 'struct' or 'union' types exceeds 63 - program does not conform strictly to ISO:C99.

428 Function identifier is not followed by () but a function call may be intended.

434 [S] The identifier '%s' has not been declared.

473 [Q] Result of 'sizeof' operation will not fit in configured type for 'size_t'.

490 Relational operator used to compare two pointers.

500 [U] Right operand of shift operator is negative - this is undefined.

501 [U] Right operand of shift operator is too large - this is undefined.

502 A right shift on signed data may be an arithmetic or a logical shift.

503 [U] Dereference of constant NULL pointer.

504 [U] Definite dereference of NULL pointer.

505 [U] Apparent dereference of NULL pointer.

506 Possible dereference of NULL pointer.

507 [u] Arithmetic operation on constant NULL pointer.

508 [u] Definite arithmetic operation on NULL pointer.

509 [u] Apparent arithmetic operation on NULL pointer.

510 Possible arithmetic operation on NULL pointer.

553 Translation unit contains no object or function definitions with external linkage.

571 This switch case label of 'essential type' '%1s' is not consistent with a controlling expression which has an essential
type of higher rank (%2s).

584 Possible division by zero.

585 [U] Apparent division by zero.

586 [U] Division by constant zero.

587 [U] Definite division by zero.

596 Value of 'case' label expression is too large for type of controlling expression in 'switch' statement.

597 Type of 'case' label expression is not consistent with type of controlling expression in 'switch' statement.

606 Object '%s' is declared using typedefs which are different to those in a previous declaration.

637 [S] Storage class specifier is illegal on 'struct' or 'union' member.

648 [S] Unexpected '{' encountered at file scope.

652 Identifiers have been provided for some but not all of the parameters in a function prototype.

666 [S] Only type qualifiers 'const' or 'volatile' are legal here in a pointer declaration.

670 [S] Function defined with invalid function header syntax.

687 Array has been initialized using concatenated strings and has fewer initializers than its declared size.

688 Array size determined by number of initializers which include concatenated string literals.

689 [u] 'Switch' statement will bypass the initialization of this local variable.

695 Type given in sizeof is not compatible with the pointed to type used to cast malloc.

696 The size of the allocated memory block is smaller than the size of the object type addressed by the pointer cast.

697 The size of the allocated memory block is not an integral multiple of the size of the object type addressed by the
pointer cast.

702 Result of sizeof operator is not explicitly cast.

703 Structure has fewer initializers than its declared size. Default initialization is applied to the remainder of the members.

722 Enum constant not explicitly initialized, but a previous constant has been.

744 [U] '%s()' has been declared with a non void return type but ends with an implicit 'return ;' statement.

752 String literal passed as argument to function whose parameter is not a 'pointer to const'.

753 String literal assigned to pointer which is not a 'pointer to const'.

769 A 'break' statement has been used to terminate an iteration statement.

776 [L] External identifier matches other external identifier(s) (e.g. '%s') in first 6 characters - program does not conform
strictly to ISO:C90.

778 [L] Identifier matches other identifier(s) (e.g. '%s') in first 31 characters - program does not conform strictly to
ISO:C90.

782 This identifier, '%s', will still be in scope when the same identifier is declared later in a different namespace.

783 A subsequent declaration of '%s' means that it is being used both as a structure/union member and also as a label,
tag or ordinary identifier.

790 This translation unit makes use of floating types.

805 [S] Invalid identifier encountered in macro parameter list.

806 [S] Comma missing in macro parameter list.

807 [S] Identifier missing in macro parameter list.

808 [Q] '#include "%s"' causes itself to be included recursively. QA C terminates execution after 8 occurrences.

815 [L] '#include <...>' file name does not conform strictly to ISO:C90.

816 [L] '#include "...'" file name does not conform strictly to ISO:C90.

817 [S] Closing quote or bracket '>' missing from include filename.

818 [Q] Cannot find '%s' - Perhaps the appropriate search path was not given ?

819 [Q] Cannot open '%s' - Perhaps the appropriate search path was not given ?

820 [S] '#include' requires a header name.

822 [Q] Cannot find forceinclude file '%s'.

823 [S] Unexpected '#else' or '#elif' directive follows '#else'.

824 [S] Unexpected '#else' or '#elif' directive found outside a '#if' block.

825 [S] Unexpected '#endif' found outside a '#if' block.

826 [S] Unexpected ':' found without a preceding '?' in a '#if' or '#elif' expression.

827 [S] Missing ':' after '?' in a '#if' or '#elif' expression.

829 [S] Could not find '#endif' preprocessing directive to close '#if...'.
Macro substitution in '#include' preprocessing directive.

832 [S] '#ifdef' or '#ifndef' must be followed by an identifier.

833 File '%1s' has already been included directly from within file '%2s'.

838 File '%1s' has already been included indirectly from within file '%2s'.

839 / character used in an include file name.

843 [S] '#define' must be followed by an identifier.

846 [S] '#undef' must be followed by an identifier.

847

849 [S] Preprocessing directive appears in the middle of a line.

855 Preprocessing results in a sequence of tokens that has the form of a preprocessing directive.

861 This #include <%s> directive is redundant.

862 This #include "%s" directive is redundant.

863 [S] '#line' encountered without a following line number.

868 An absolute path has been specified in a #include statement.

869 [Q] '#error' directive: %s Analysis terminated due to '#error' directive.

879 [S] Illegal operator in '#if' or '#elif' expression.

882 The forceinclude file '%s' is redundant in this translation unit.

886 [S] Missing or invalid expression in '#if' or '#elif' directive.

889 #undef refers to a macro that has previously been #undef'd.

890 #ifdef refers to a macro that has been #undef'd in a previous #if block.

891 #ifndef refers to a macro that has been #undef'd previously.

896 [S] Missing operand in '#if' or '#elif' expression.

897 [S] Missing operator in '#if' or '#elif' expression.

898 [S] Unexpected ')' or ':' in '#if' or '#elif' expression.

901 Source skipped to this point after error in top level declaration.

902 Source skipped to this point after error in parameter declaration.

903 Source skipped to this point after error in member declaration.

904 [S] Invalid designator.

907 [S] Unexpected token.

911 Inserted '%s' token in an attempt to continue parsing.

913 Source skipped to this point after error in 'case' label.

917 [S] Unable to recover from syntax errors in this source file.

918 [Q] Source too complex. Please report this problem to Programming Research Technical Support.

920 Source skipped to this point after error in expression.

925 [S] Unexpected end of file.

926 [S] Expected:%s.

927 [S] Unexpected ')'.

928 [S] Missing comma ',' between enumerators.

970 [Q] Unable to create preprocessed file.

974 [I] Cast of integer constant expression to a signed integer type which cannot represent the value.

977 Cast of a constant negative value to an unsigned type.

980 Cast of constant negative value which assumes a two's complement representation of signed values.

1004 [S] '#endasm' found without matching '#asm' preprocessing directive.

1005 [S] End-of-file encountered when expecting '#%s' preprocessing directive.

1009 [S] Unrecognizable expression in '#if' preprocessing directive.

1010 [S] '#%s' is not a valid form of '#if' syntax .

1013 [S] Use of a C++ reference type ('type &').

1100 The label '%s' is also declared as a typedef.

1250 Unsuffixed integer constant causes implicit conversion of other operand.

1251 Suffixed integer constant causes implicit conversion of other operand.

1252 Suffixed integer constant implicitly converted to different integer type.

1253 Unsuffixed integer constant implicitly converted to different integer type.

1254 Suffix is not consistent with a type of unsigned long.

1255 Unsuffixed integer constant is not of type int.

1258 Suffixed integer constant cast to a different integral type.

1259 Unsuffixed integer constant cast to a different integral type.

1260 Integer constant implicitly converted to a floating type.

1261 Suffixed floating constant implicitly converted to different floating type.

1262 Unsuffixed floating constant implicitly converted to different floating type.

1263 Floating constant causes implicit conversion of other (integral) operand.

1267 Suffixed floating constant cast to another type.

1268 Unsuffixed floating constant cast to another type.

1269 Floating constant cast to integral type.

1271 Using a non-int expression to define an enum constant.

1272 Redundant leading zeroes on a numeric constant.

1274 Unsuffixed floating constant causes implicit conversion of other (floating) operand.

1275 Suffixed floating constant causes implicit conversion of other (floating) operand.

1276 An integer constant is being converted to floating type on assignment.
1277 Hex constant does not include a "U" suffix.
1278 Decimal constant includes a suffix.
1279 Hex constant includes an "L" suffix.
1280 A lowercase letter L (l) has been used in an integer or floating suffix.
1300 '%s' is a keyword in C++.
1301 '%s' is a keyword in some C++ implementations.
1302 '%s()' must be declared before use in C++.
1303 An empty parameter list in a function type has a different meaning in C++.
1304 Old style definition of function '%s()' is not portable to C++.
1305 The global object '%s' declared 'const' has external linkage in C but internal linkage in C++.
1306 Multiple tentative definitions of '%s'. This is not allowed in C++.
1307 Unnamed 'struct' and 'union' types may cause portability problems when moving to C++.
1308 The tag '%s' would clash with an existing typedef in C++.
1309 The typedef '%s' would clash with an existing 'struct' / 'union' / 'enum' tag in C++.
1310 '%s' is used as a tag and a typedef for the same 'struct' / 'union' / 'enum'.
1311 'void *' and 'const T *' pointers used as operands to an equality or conditional operator.
1312 The array being initialized is not large enough to hold a terminating null byte for the string initializer.
1313 Executing 'goto %s' will cause local initialization to be skipped.
1314 The tag '%s' is defined within another 'struct' / 'union'.
1315 The 'static' qualifier has been used in the declaration of a tag.
1318 Object of enum type is being modified with a compound assignment operator.
1319 Object of enum type is being modified with an increment or decrement operator.
1322 In C, sizeof('c') == sizeof(int), but in C++, sizeof('c') == sizeof(char) == 1.
1323 The sizeof operator has been applied to an enum constant.
1324 Function 'main' cannot be called or have its address taken in C++.
1325 '%s()' is defined with a non-void return type but contains 'return;'. This is not allowed in C++.
1327 The macro __STDC__ has been used. It may not be present in a C++ environment.
1328 Tag type defined within a function declaration.
1329 The global object '%s' declared 'const' has been defined without an explicit initializer. This is not allowed in C++.
1334 The parameter identifiers in the prototypes of these functions/function pointers are different.
1400 Enum object is being compared with an enum constant of a different enum type using an equality operator.
1401 An enum constant is being passed as argument to a function parameter of a different enum type.
1402 An enum constant is being assigned to an object of a different enum type.
1403 An enum constant is being returned from a function with a different enum return type.
1404 Enum object is being compared with an enum constant of a different enum type using a relational operator.
1410 Enum object is being compared with a constant, non-enum expression using an equality operator.
1411 A constant expression of non-enum type is being passed as argument to a function parameter of enum type.
1412 A constant expression of non-enum type is being assigned to an object of enum type.
1413 A constant expression of non-enum type is being returned from a function with an enum return type.
1414 Enum object is being compared with a constant, non-enum expression using a relational operator.
1420 Enum object is being compared with an object of a different enum type using an equality operator.
1421 An enum object is being passed as argument to a function parameter of a different enum type.
1422 An enum object is being assigned to an object of a different enum type.
1423 An enum object is being returned from a function with a different enum return type.
1424 Enum object is being compared with an object of a different enum type using a relational operator.
1431 An enum object is being passed as argument to a function parameter of non-enum type.
1432 An enum object is being assigned to an object of non-enum type.
1433 An enum object is being returned from a function with a non-enum return type.
1434 This enum constant is not representable in a 16 bit integer type.
1440 Enum object is being compared with a non-constant, non-enum expression using an equality operator.
1441 A non-constant expression of non-enum type is being passed as argument to a function parameter of enum type.
1442 A non-constant expression of non-enum type is being assigned to an object of enum type.
1443 A non-constant expression of non-enum type is being returned from a function with an enum return type.
1444 Enum object is being compared with a non-constant, non-enum expression using a relational operator.
1470 Numeric constant used as 'case' label with 'switch' expression of enum type.
1472 Enum constant used as 'case' label with 'switch' expression of different enum type.
1473 The 2nd and 3rd operands of this conditional operator (? :) are of different enum types.
1474 Object of enum type is being modified with a bitwise compound assignment operator.

1475 Range of possible enum values suggests this test is always true.

1476 Range of possible enum values suggests this test is always false.

1477 Object of enum type is being implicitly compared against zero in a controlling expression.

1478 Object of an enum type which does not include a zero value, is being implicitly compared against zero in a controlling expression.

1479 Object of enum type is being modified with an arithmetic compound assignment operator.

1480 Objects or constants of different enum types are operands of a bitwise operator.

1481 Object of enum type is being modified with an increment or decrement operator.

1482 Non-constant expression cast to enum type.

1483 Enum object or constant passed as argument to function declared in K&R style.

1484 Constant expression cast to enum type.

1500 The object '%1s' is declared but is not used within this project.

1501 The function '%1s' is declared but is not used within this project.

1502 The object '%1s' is defined but is not used within this project.

1512 Identifier '%1s' with external linkage has separate declarations in multiple translation units.

1515 Different files are being used which have the same filename '%1s'.

1516 Different files are being used which have similar filenames '%1s', but with different case.

1517 Different files are being used which have the same filename '%1s', and one includes the other.

1531 The object '%1s' is referenced in only one translation unit - but not the one in which it is defined.

1532 The function '%1s' is only referenced in one translation unit - but not the one in which it is defined.

1533 The object '%1s' is only referenced by function '%2s'.

1540 Unable to open file '%1s'.

1569 Issue for message '%1s' found here (even if not visible).

1570 Called from here.

1571 Occurs on %1s iteration.

1572 Return statement here.

1573 Last unreachable statement.

1574 Viable path.

1575 Variable '%1s' previously seen here. (Specimen value: '%2s').

1576 Label statement here.

1577 Next seen here.

1578 Found in directory: '%1s'.

1579 Referenced here.

1580 Function '%1s' calls '%2s' here.

1581 %1s %2s here.

1582 Previously seen here.

1585 Next set here.

1586 Previously set here.

1590 Offending operand.

1592 '%1s' declared in %2s %3s'.

1593 '%1s' defined here.

1594 '%1s' declared here.

1599 Included from here.

1690 Null preprocessing directive used.

1691 Null preprocessing directive used in an excluded section of code.

2000 No 'else' clause exists for this 'if' statement.

2005 A 'continue' statement has been used.

2006 '%s()' has more than one 'return' path.

2007 'auto' does not add information to a declaration, and is best avoided.

2010 The function '%s()' must not be called.

2011 The 'register' storage class specifier has been used.

2015 A statement 'label' has been used.

2016 This 'switch' statement 'default' clause is empty.

2017 Comment spans more than one line.

2018 This 'switch' 'default' label is probably unreachable.

2021 This tentative definition is interpreted as a declaration. Is this intended ?

2022 A tentative definition is being used. Is it appropriate to include an explicit initializer ?

2100 Integral promotion : unsigned char promoted to signed int.

2101 Integral promotion : unsigned short promoted to signed int.

2102 Integral promotion : unsigned char promoted to unsigned int.
2103 Integral promotion : unsigned short promoted to unsigned int.
2104 Integral promotion : signed char promoted to signed int.
2105 Integral promotion : signed short promoted to signed int.
2106 Integral promotion : plain char promoted to signed int.
2107 Integral promotion : plain char promoted to unsigned int.
2109 Integral promotion : `_Bool` promoted to signed int.
2110 Default argument promotion : unsigned char promoted to signed int.
2111 Default argument promotion : unsigned short promoted to signed int.
2112 Default argument promotion : unsigned char promoted to unsigned int.
2113 Default argument promotion : unsigned short promoted to unsigned int.
2114 Default argument promotion : signed char promoted to signed int.
2115 Default argument promotion : signed short promoted to signed int.
2116 Default argument promotion : plain char promoted to signed int.
2117 Default argument promotion : plain char promoted to unsigned int.
2118 Default argument promotion : float promoted to double.
2119 Default argument promotion : `_Bool` promoted to signed int.
2120 Integral promotion : unsigned bit-field promoted to signed int.
2122 Integral promotion : unsigned bit-field promoted to unsigned int.
2124 Integral promotion : signed bit-field promoted to signed int.
2130 Default argument promotion : unsigned bit-field promoted to signed int.
2132 Default argument promotion : unsigned bit-field promoted to unsigned int.
2134 Default argument promotion : signed bit-field promoted to signed int.
2200 Indentation of this line is to the left of the line above.
2201 This indentation is not consistent with previous indentation in this file.
2203 This closing brace is not aligned appropriately with the matching opening brace.
2204 '%s' is not aligned to match its controlling 'switch' statement.
2205 More than one declaration or statement on the same line.
2207 This brace style is not consistent with 'K&R' style.
2208 This brace style is not consistent with 'indented' style.
2209 This brace style is not consistent with 'exdented' style.
2210 Tab character encountered in this line.
2211 '%s' is not aligned with the previously declared identifier.
2213 Matching braces appear on the same line - proper indentation would be preferred.
2215 This indentation is not consistent with configured depth.
2216 More than one structure or union member declared on the same line.
2217 Line length exceeds %s characters.
2461 Loop control variable, %s, has file scope.
2464 Loop control variable, %s, modified twice in for-loop header.
2465 This 'for' loop will only be executed once.
2466 The value of this controlling expression is always 'false'. The contained code is unreachable.
2467 Loop control variable, %s, is not modified inside loop.
2468 Loop control variable, %s, is not modified inside loop but has file scope.
2470 Taking address of loop control variable, %s.
2471 Unable to identify a loop control variable.
2472 More than one possible loop control variable.
2740 This loop controlling expression is a constant expression and its value is 'true'.
2741 This 'if' controlling expression is a constant expression and its value is 'true'.
2743 This 'do - while' loop controlling expression is a constant expression and its value is 'false'. The loop will only be executed once.
2750 Internal dataflow problem. Dataflow analysis continues with the next function. Please inform Programming Research.
2751 This function is too complex. Dataflow analysis continues with the next function.
2752 This '%1s' results in the function being too complex. Dataflow analysis continues with the next function.
2753 As a result of error message '%s', dataflow analysis of the remainder of this function is not possible.
2754 As a result of error message '%s', dataflow analysis of the remainder of this translation unit is not possible.
2755 Analysis time of function '%1s' has exceeded the configured maximum: '%2sms'. Dataflow analysis continues with the next function.
2756 Could not expand function call to '%1s' with maximum '-po df::inter' value.
2757 Could not analyze function '%1s'.

2773 Suspicious: These pointers address different objects.
2778 Suspicious: Copy between overlapping objects.
2793 Suspicious: Right hand operand of shift operator is negative or too large.
2803 Suspicious: Overflow in signed arithmetic operation.
2813 Suspicious: Dereference of NULL pointer.
2814 Possible: Dereference of NULL pointer.
2823 Suspicious: Arithmetic operation on NULL pointer.
2824 Possible: Arithmetic operation on NULL pointer.
2833 Suspicious: Division by zero.
2834 Possible: Division by zero.
2843 Suspicious: Dereference of an invalid pointer value.
2848 Suspicious: Maximum number of characters to be written is larger than the target buffer size.
2858 Suspicious: Casting to a signed integer type of insufficient size.
2863 Suspicious: Implementation-defined value resulting from left shift operation on expression of signed type.
2870 Infinite loop construct with constant control expression.
2881 The code in this 'default' clause is unreachable.
2893 Suspicious: Negative value implicitly converted to an unsigned type.
2898 Suspicious: Negative value cast to an unsigned type.
2903 Suspicious: Positive integer value truncated by implicit conversion to a smaller unsigned type.
2905 Constant: Positive integer value truncated by cast to a smaller unsigned type.
2906 Definite: Positive integer value truncated by cast to a smaller unsigned type.
2907 Apparent: Positive integer value truncated by cast to a smaller unsigned type.
2908 Suspicious: Positive integer value truncated by cast to a smaller unsigned type.
2913 Suspicious: Wraparound in unsigned arithmetic operation.
2920 Constant: Left shift operation on expression of unsigned type results in loss of high order bits.
2921 Definite: Left shift operation on expression of unsigned type results in loss of high order bits.
2922 Apparent: Left shift operation on expression of unsigned type results in loss of high order bits.
2923 Suspicious: Left shift operation on expression of unsigned type results in loss of high order bits.
2933 Suspicious: Computing an invalid pointer value.
2940 Constant: Result of implicit conversion is only representable in a two's complement implementation.
2941 Definite: Result of implicit conversion is only representable in a two's complement implementation.
2942 Apparent: Result of implicit conversion is only representable in a two's complement implementation.
2943 Suspicious: Result of implicit conversion is only representable in a two's complement implementation.
2945 Constant: Result of cast is only representable in a two's complement implementation.
2946 Definite: Result of cast is only representable in a two's complement implementation.
2947 Apparent: Result of cast is only representable in a two's complement implementation.
2948 Suspicious: Result of cast is only representable in a two's complement implementation.
2950 Constant: Negative value used in array subscript or pointer arithmetic operation.
2951 Definite: Negative value used in array subscript or pointer arithmetic operation.
2952 Apparent: Negative value used in array subscript or pointer arithmetic operation.
2953 Suspicious: Negative value used in array subscript or pointer arithmetic operation.
2963 Suspicious: Using value of uninitialized automatic object '%s'.
2973 Suspicious: Passing address of uninitialized object '%s' to a function parameter declared as a pointer to const.
3003 This character constant is being interpreted as a NULL pointer constant.
3004 This integral constant expression is being interpreted as a NULL pointer constant.
3103 Result of signed division or remainder operation may be implementation defined.
3104 [S] #pragma '%s' has invalid arguments and has been ignored.
3105 [S] A #pragma block has not been closed with a #pragma '%s'.
3106 This preprocessing directive has been ignored because it lies within a #pragma block. #pragma '%s' expected.
3107 [S] A #pragma '%s' has been found without a matching #pragma block start directive.
3109 Null statement follows other code on the same line.
3111 Redundant comma at end of braced initializer will be ignored.
3117 Expected 'on' or 'off' after '#pragma' flag.
3118 Using the #line preprocessing directive.
3120 Hard-coded 'magic' integer constant, '%s'.
3121 Hard-coded 'magic' floating constant, '%s'.
3122 Hard-coded 'magic' string literal, %s.
3123 Hard coded 'magic' character constant, %s.
3131 Hard coded 'magic' number, '%s', used to define the size of a bit-field.

3132 Hard coded 'magic' number, '%s', used to define the size of an array.

3139 Null statement is obscured by code or comment on the same line.

3140 Null statement occurs on a line by itself.

3141 Null statement does not occur on a line by itself.

3195 The function parameter '%s' is always modified before use.

3196 The variable '%s' is never set.

3197 This initialization is redundant. The value of '%s' is never used before being modified.

3198 This assignment is redundant. The value of '%s' is never used before being modified.

3199 This assignment is redundant. The value of '%s' is never subsequently used.

3201 This statement is unreachable.

3202 The label '%s:' is not used in this function and could be removed.

3203 The variable '%s' is set but never used.

3204 The variable '%s' is only set once and so it could be declared with the 'const' qualifier.

3205 The identifier '%s' is not used and could be removed.

3206 The parameter '%s' is not used in this function.

3207 File scope static, '%s', is not used, and could be removed.

3208 '%s()' returns a value which is sometimes ignored.

3209 '%s()' returns a value which is always ignored.

3210 The global identifier '%s' is declared here but is not used in this translation unit.

3211 The global identifier '%s' is defined here but is not used in this translation unit.

3212 This cast is redundant.

3216 Address of local static object exported to a pointer with linkage or wider scope.

3220 Identifier declared at a nested level of block scope.

3223 Object with static storage duration declared at block scope.

3226 The result of an assignment is being used in an arithmetic operation or another assigning operation.

3227 The parameter '%s' is never modified and so it could be declared with the 'const' qualifier.

3228 Storage class specifier not positioned at the beginning of declaration.

3229 File scope static, '%s', is written but never used.

3231 Address of local static object exported using a function parameter.

3232 File scope static, '%s', is never modified. It could be declared const.

3233 File scope static, '%s', is not explicitly initialized but its value is used.

3240 inline function '%s' is being defined with external linkage.

3243 inline function '%s' is also an 'external definition'.

3290 Truncation of positive constant integer value during cast to a smaller unsigned type.

3296 Definite truncation of positive integer value during implicit conversion to a smaller unsigned type.

3297 Apparent truncation of positive integer value during implicit conversion to a smaller unsigned type.

3301 Truncation of bits in an unsigned left shift operation on a constant value.

3302 Wraparound past zero in unsigned subtraction of constant operands.

3303 Wraparound past zero in unsigned addition of constant operands.

3304 Wraparound past zero in unsigned multiplication of constant operands.

3305 Pointer cast to stricter alignment.

3306 Truncation of positive constant integer value during implicit conversion to a smaller unsigned type.

3308 'static %s()' has been declared but no definition has been provided. This is redundant.

3309 The value of the controlling expression in this 'switch' statement is constant.

3313 No definition has been found for structure/union tag '%s'.

3314 This controlling expression is an assignment.

3316 An unsigned value can never be less than zero - this test is always false.

3321 [U] The variable '%s' is definitely unset at this point.

3323 This controlling expression has a constant 'true' value.

3324 An unsigned value is always greater than or equal to zero - this test is always true.

3325 This 'while' or 'for' loop controlling expression has a constant 'false' value.

3328 An unsigned value is being compared with a negative constant - this is dangerous.

3329 This 'if' controlling expression has a constant 'false' value.

3330 '%s()' has been called with a variable number of arguments.

3333 A 'break' statement has been used in the middle of a 'switch' 'case'/'default' clause.

3337 The array '%s[]' is defined with a single element because no size has been specified.

3343 Logical NOT being performed on one operand of a comparison.

3345 Statement contains more than one access to objects that are volatile.

3346 The controlling expression in this 'if' statement has a constant 'true' value.

3347 [U] The variable '%s' is apparently unset at this point.
3348 Definite use of unset pointer as an argument to a function which expects a read-only pointer.
3349 Apparent use of unset pointer as an argument to a function which expects a read-only pointer.
3352 This 'switch' statement contains only two execution paths.
3353 The variable '%s' is possibly unset at this point.
3354 Possible use of unset pointer as an argument to a function which expects a read-only pointer.
3355 The result of this logical operation is always 'true'.
3356 The result of this logical operation is always 'false'.
3357 The value of this loop controlling expression is always 'true'.
3358 The value of this 'if' controlling expression is always 'true'.
3359 The value of this controlling expression is always 'false'.
3360 The value of this 'do - while' controlling expression is always 'false'. The loop will only be executed once.
3361 Using a 'do-while-zero' construct. The loop will only be executed once.
3371 Definite truncation of bits in an unsigned left shift operation.
3372 Definite wraparound past zero in an unsigned arithmetic operation.
3381 Apparent truncation of bits in an unsigned left shift operation.
3382 Apparent wraparound past zero in an unsigned arithmetic operation.
3390 Expression is equivalent to: "%s"
3401 Possible precedence confusion: extra parentheses are recommended here.
3403 This sequence of operators is difficult to read without intervening spaces.
3404 Statement contains a redundant * operator at top level. *p++ means *(p++) not (*p)++.
3405 Index[Array] is equivalent to Array[Index] but more confusing.
3407 String literal compared using a relational or equality operator.
3414 Macro defines a storage-class or function specifier keyword.
3416 Logical operation performed on expression with possible side effects.
3419 Initialization expression of 'for' statement has no side effects.
3420 Increment expression of 'for' statement has no side effects.
3422 Statement contains a redundant operator at top level.
3423 Statement contains a redundant cast at top level.
3424 Statement contains a redundant & or | at top level.
3428 Macro defines a type qualifier keyword.
3429 A function-like macro is being defined.
3430 Macro argument expression may require parentheses.
3435 Parameter '%s' occurs more than once in the replacement list of this macro.
3436 Macro definition hides previously declared identifier.
3441 Function call argument is an expression with possible side effects.
3442 Operator other than & (address-of) or = (assignment) applied to a volatile object.
3443 Macro '%s' has a replacement list which appears recursive.
3446 The 2nd or 3rd operand of this conditional operator is an expression with possible side effects.
3454 Macro argument contains an increment, decrement or assignment operator.
3455 Macro argument contains a function call.
3456 Parameter '%s' will be evaluated more than once when this macro is used.
3457 Macro defines a braced initializer.
3459 Macro defines a 'do-while-zero' construct.
3470 The operand of 'sizeof' is not an expression which designates either an object or a type.
3491 Using conditional operator in a macro.
3492 Using conditional operator outside a macro.
3495 Using a conditional operator in place of a selection statement.
3501 Absence of space between assignment operator and following unary operator may cause confusion.
3600 Using the unary '+' operator.
3602 Using one of the keywords 'signed', 'const', 'volatile' or 'enum'.
3603 Using 'extern' in the definition of a global variable.
3604 Using an initializer when defining an automatic object of struct, union or array type.
3605 Type of 'switch' controlling expression cannot be represented in type 'int'.
3606 This unsuffixed decimal constant has type 'long', but had type 'unsigned int' in K&R C.
3607 Parameter '%s' declared with function type in a K&R style function definition.
3608 Using the '#elif' preprocessing directive.
3609 Using the alert escape sequence '\\a'.
3611 Non-portable comparison of plain 'char' with negative constant.

3612 Nonportable comparison of plain 'char' with zero.
3613 Some pre-ISO compilers would treat this 8 or 9 as an octal digit.
3614 Macro '%s' is being defined more than once without using #undef to remove the previous definition.
3615 Using 'entry' as an identifier.
3616 Character constants may have different values in preprocessor arithmetic than in actual code.
3617 Assignment of a struct/union by value.
3618 Whitespace used after '#' at the start of this preprocessing directive.
3619 Whitespace used before '#' at the start of this preprocessing directive.
3620 'register' may be illegal on array and 'struct' / 'union' types in some compilers.
3621 A bit-field is being defined as a member of a struct or union.
3623 Passing a struct/union by value as a function argument.
3624 Function returns a struct/union by value.
3625 Type 'char' has been used in the declaration of an object or a function.
3626 Double-quote character in a character constant is not preceded by a backslash character.
3627 Single-quote character in a string literal is not preceded by a backslash character.
3631 Type 'char' has been used in a cast.
3632 Type 'char' has been used in the declaration of a typedef.
3633 Type 'char' has been used in the operand of the sizeof operator.
3650 Typedef defines an array type of unknown size.
3651 Using a typedef for an array of unknown size can lead to unexpected results.
3661 Plain int bit-field compared with zero.
3662 Plain int bit-field compared with negative constant.
3663 Unnamed bit-field defined with non-zero width.
3671 Function called via pointer to function.
3672 Using non-const pointer to function.
3674 Array size defined implicitly by the number of initializers.
3680 [U] Access outside bounds of array using a constant array subscript.
3681 Use of a constant negative value in array subscript operation or pointer arithmetic.
3685 [U] Definite access outside bounds of array.
3686 Definite use of a negative value in array subscript operation or pointer arithmetic.
3689 [U] Apparent access outside bounds of array.
3690 Apparent use of a negative value in array subscript operation or pointer arithmetic.
3700 Implicit conversion: char to signed char.
3701 Implicit conversion: char to unsigned char.
3702 Implicit conversion: char to short.
3703 Implicit conversion: char to unsigned short.
3704 Implicit conversion: char to int.
3705 Implicit conversion: char to unsigned int.
3706 Implicit conversion: char to long.
3707 Implicit conversion: char to unsigned long.
3708 Implicit conversion: char to float.
3709 Implicit conversion: char to double.
3710 Implicit conversion: char to long double.
3711 Implicit conversion: unsigned char to char.
3712 Implicit conversion: unsigned char to signed char.
3713 Implicit conversion: unsigned char to short.
3715 Implicit conversion: unsigned char to int.
3717 Implicit conversion: unsigned char to long.
3719 Implicit conversion: unsigned char to float.
3720 Implicit conversion: unsigned char to double.
3721 Implicit conversion: unsigned char to long double.
3722 Implicit conversion: signed char to char.
3723 Implicit conversion: signed char to unsigned char.
3725 Implicit conversion: signed char to unsigned short.
3727 Implicit conversion: signed char to unsigned int.
3729 Implicit conversion: signed char to unsigned long.
3730 Implicit conversion: signed char to float.
3731 Implicit conversion: signed char to double.
3732 Implicit conversion: signed char to long double.

3733	Implicit conversion: short to char.
3734	Implicit conversion: short to signed char.
3735	Implicit conversion: short to unsigned char.
3736	Implicit conversion: short to unsigned short.
3738	Implicit conversion: short to unsigned int.
3740	Implicit conversion: short to unsigned long.
3741	Implicit conversion: short to float.
3742	Implicit conversion: short to double.
3743	Implicit conversion: short to long double.
3744	Implicit conversion: unsigned short to char.
3745	Implicit conversion: unsigned short to signed char.
3746	Implicit conversion: unsigned short to unsigned char.
3747	Implicit conversion: unsigned short to short.
3748	Implicit conversion: unsigned short to int.
3750	Implicit conversion: unsigned short to long.
3752	Implicit conversion: unsigned short to float.
3753	Implicit conversion: unsigned short to double.
3754	Implicit conversion: unsigned short to long double.
3755	Implicit conversion: int to char.
3756	Implicit conversion: int to signed char.
3757	Implicit conversion: int to unsigned char.
3758	Implicit conversion: int to short.

4119	Result of floating point operation cast to an integral type.
4120	Implicit conversion: complex expression of integral type to wider type.

4121 Cast of complex expression of integral type to wider type.

4123 Implicit conversion: complex expression of type float to type double.

4124 Implicit conversion: complex expression of type float to type long double.

4125 Implicit conversion: complex expression of type double to type long double.

4126 Cast of complex expression of type float to type double.

4127 Cast of complex expression of type float to type long double.

4128 Cast of complex expression of type double to type long double.

4130 Bitwise operations on signed data will give implementation defined results.

4131 Left shift operation on signed operand.

4139 Address of local static object exported in function return value.

4150 The identifier '%s' may cause confusion because it contains only the letter 'l' and the number '1'.

4151 The identifier '%s' may cause confusion because it contains only the letter 'O' and the number '0'.

4152 The identifier '%s' may cause confusion because the letter 'l' and the number '1' are adjacent.

4153 The identifier '%s' may cause confusion because the letter 'O' and the number '0' are adjacent.

4301 An expression of 'essentially Boolean' type (%1s) is being cast to character type '%2s'.

4302 An expression of 'essentially Boolean' type (%1s) is being cast to enum type '%2s'.

4303 An expression of 'essentially Boolean' type (%1s) is being cast to signed type '%2s'.

4304 An expression of 'essentially Boolean' type (%1s) is being cast to unsigned type '%2s'.

4305 An expression of 'essentially Boolean' type (%1s) is being cast to floating type '%2s'.

4310 An expression of 'essentially character' type (%1s) is being cast to Boolean type, '%2s'.

4312 An expression of 'essentially character' type (%1s) is being cast to enum type, '%2s'.

4315 An expression of 'essentially character' type (%1s) is being cast to floating type, '%2s'.

4320 An expression of 'essentially enum' type (%1s) is being cast to Boolean type, '%2s'.

4322 An expression of 'essentially enum' type (%1s) is being cast to a different enum type, '%2s'.

4325 An expression of 'essentially enum' type (%1s) is being cast to floating type, '%2s'.

4330 An expression of 'essentially signed' type (%1s) is being cast to Boolean type '%2s'.

4332 An expression of 'essentially signed' type (%1s) is being cast to enum type, '%2s'.

4340 An expression of 'essentially unsigned' type (%1s) is being cast to Boolean type '%2s'.

4342 An expression of 'essentially unsigned' type (%1s) is being cast to enum type '%2s'.

4350 An expression of 'essentially floating' type (%1s) is being cast to Boolean type '%2s'.

4351 An expression of 'essentially floating' type (%1s) is being cast to character type '%2s'.

4352 An expression of 'essentially floating' type (%1s) is being cast to enum type, '%2s'.

4521 An expression of 'essentially enum' type (%1s) is being used as the %2s operand of this arithmetic operator (%3s).

4522 An expression of 'essentially enum' type (%1s) is being used as the %2s operand of this bitwise operator (%3s).

4523 An expression of 'essentially enum' type (%1s) is being used as the left-hand operand of this shift operator (%2s).

4524 An expression of 'essentially enum' type (%1s) is being used as the right-hand operand of this shift operator (%2s).

4527 An expression of 'essentially enum' type is being used as the operand of this increment/decrement operator.

4534 An expression of 'essentially signed' type (%1s) is being used as the right-hand operand of this shift operator (%2s).

4542 A non-negative constant expression of 'essentially signed' type (%1s) is being used as the %2s operand of this bitwise operator (%3s).

4543 A non-negative constant expression of 'essentially signed' type (%1s) is being used as the left-hand operand of this shift operator (%2s).

4544 A non-negative constant expression of 'essentially signed' type (%1s) is being used as the right-hand operand of this shift operator (%2s).

4570 The operand of this ~ operator has an 'essential type' which is narrower than type 'int'.

4571 The left-hand operand of this << operator has an 'essential type' which is narrower than type 'int'.

4620 The macro '%1s' may also be defined as a macro in '<%2s>'.

4621 The macro '%1s' may also be defined as a typedef in '<%2s>'.

4622 The identifier '%1s' may be defined as a macro in '<%2s>'.

4623 The typedef '%1s' may also be defined in '<%2s>'.

4624 The ordinary identifier '%1s' may be defined as a typedef in '<%2s>'.

4640 The macro '%1s' could conflict in the future with the name of a macro in '<%2s>'.

4641 The identifier '%1s' could conflict in the future with the name of a macro in '<%2s>'.

4642 The macro '%1s' could conflict in the future with the name of a function in '<%2s>'.

4643 The identifier '%1s' could conflict in the future with the name of a function in '<%2s>'.

4644 The macro '%1s' could conflict in the future with the name of a typedef in '<%2s>'.

4645 The identifier '%1s' could conflict in the future with the name of a typedef in '<%2s>'.

4700 Metric value out of threshold range: %s.

4800 The identifier '%1s' does not conform to the name rule

4810 Invalid annotation: tag '%1s' is not defined subsequently in this file.

4811	The start of the range '%1s', starts and ends at the same location.
4812	'%1s' not allowed here.
4820	Annotation kind is expected.
4821	Colon is expected.
4822	Tag name is expected.
4823	Annotation syntax error.
4824	Invalid character in tag name.
4825	Unexpected character.
4826	Message specification is incomplete or missing.
4827	Tag name is not allowed in the message specification of continuous suppression annotation.
4828	Invalid usage of predefined location tag.
